## gitav aud

To find the time of high-water at any of the places named in the following table, add time indicated in the Arst column of fignres to the time of "Moon south." found in the calendar pages. If the result is more than 12 hours from noon, the time will be the next day in the morning, and if more than 12 hours from midnight, the time will be in the afternoon of the same day. The tide thus found is the first after the Moon's culmination. The second tide occurs 12 hours and 26 minutes later than the first.

## 

## cifornitg stars.

Venus ( $?$ ) until July 15.
Mars ( 2 ) after May 17.
Jupiter ( 4 ) after Angust 2.

## daucts drigltest.

Mercury January 27, May 25, and September 18, rising before the Sun; also April 2, July 31, and November 24, setting soon after the Sun. Venus and Mars not this year. Jupiter uanuary 15. Saturn July 9.

## G Table of gixty-me eright ghat.

To ascertain when any Star found in the following Table will be on the upper meridian, add the numbers opposite in the left-hand column of figures to the time of "sidereal Noon," found in the calendar pages. For the rising of a star, subtract the number opposite in the right-hand column of figures from its meridian passage. For the setting of a star, add the eame number to its meridian passage. Those marked (....) revolve in a circle of perpetual apparition, and do not risc nor set north of the latitude of New York $\left(40^{\circ} 42^{\prime} 40^{\prime \prime}\right)$, for which latitude the semi-diurnel arcs are calculated. The civil day begins at midnight, and consequently 24 hours after midnight, n: 12 lours from noon, is morning of the succeeding day; and more than 21 hour3 from noon, is cieniny of tive next day. This table is arranged in the order of culmination.

Surveyors and Civil Eagineers may obtain the declination of the magnetic needle by observations on the Polc Star when upon the mer dian, or whea at is greatest elnggation east or west. Polams and other stars pass the luwer mer diai 11 h 5 mi. ate tivir wop trans t. To the

 efongation. Observatioas modent thatime of gie itcet e'ongation are fos lajs, to error thay thos madeat the time of teansit Themena distan of Poaris from tha pulethis yar is $10.23^{\prime} 2322^{\prime \prime \prime}$. 'To

Containing a complete list of FLOWER and VEGETABLE SEEDS, with directions for cultivation, also,

## PETER HENDERSON'S

Spring Catalogue of New and Rare Plants,
Each contains a colored plate, and combined, mako about 200 pares, are now ready, and will be mailed on receipt of 25 cents.

Escedsmen, 35 Cortlandt Strest, W. V.

## [From the Montreal Gazette.]

The arriral of the Russian Grand Duko Alexis off Sandy Hook in the frigate Sretlana, took place on Saturday nizht. On the following morning, whilo all the other papers of New Iork contained complaints and laments at the tardiness of the Russian fleet, the Herald had a full account of the arrival, the special news-yacht of that journal haring gained the intelligence in adrance of all its contemporaries. Such enterprise is certainly deserving of the highest praise, and probably has never been surpassed in the whole history of journalism.

## [From the Irew York Evening 11ail.]

The Herald of to-day pablishes a fire-colums report from the African expedition fitted out orer a year ago to proceed in search of Dr. Liringstone. The expedition, at the beginning of July last, was at Kwilhara, an Arab village, 525 miles from Zanzibar. The first tidings of Livingstone were obtained at this point, and, though not conclusire, seem to justify the belief that he is still alive, though suffering from the desertion of his men and the want of proper supplies. The expedition, which is certainly one of the most remarkable journalistic enterprises the world has known, will.continue its march antil the explorer is found, or a definite and final conclusion is reached as to his fate.

## [From the Annapolis (Md.) Gazette.]

Thr New York Herald continues to be the leading newspaper of the United States-indeed of the whole world-for enterprise and success in all its news departments. It has had many competitors for the leadership, and thousands of money have been squandered in the vain effort to outstrip it in the race for the latest and most reliable news from all quarters of the globe, No prudent city merchant, broker, or live business man would venture apon the day's operations before consulting the columns of the Herald and carefully considering the effect of its news from all quarters-the latest and most reli-able-may have upon the business of trade; and those who are not in the whirl of trade and commerce, who would neglect to read its well-filled columns, would find themselves a day bohind in the world's doings. This leadership in the newspaper business has been earnod by skill and enterprise, and the most liberal use of money for correspondenoe, for telegrams, for expresses, and for all the appliances by which time and space may be annihilated. May success continue to crown with lasrels the unrivaled newspaper of the world-The New Yobk Herald.

## THE HERALD AND THE CZAR.

[From the New Forl Commercial Advertiser.]
Wre aro pleased to notice again in the columns of a morning journal the frequent association of the names of the New York IIerald and the Czar of Iussia. This is what that distinguished philosopher, known in the veracious history of "Tom Jones" by the name of Square, would donominate to bo according to the "eternal fitness of things." As His Mightiness of Russia is the most enterprising of all the monarchs of the world, so is the New Yonk Merald the most enterprising of all the newspapers of the world. If we had been asked to bestow the richest boon that could be conferred upon the imperial progenitor of Alexis we should have, without hesitation, elected to have placed on his breakfast table yesterday morning a cony of this same New York Merald, confident that the royal parent would hare rogarded such a gift as more precious than the most precious jowel in his crown.

[From the New York St. Peter.]
The New York Herald is now putting in the claim that it is tholeading religious paper in the United States. We admit the claim, but let us explain the acknowledgment. There is nothing dear to Methodism which the Herald does not diffuse; there is nothing in hard Calvinism which it does not widely spread; there is nothing in Beechcrism, the new ereed, which it does not loudly appland; there is nothing in Universalism to which it does not gire amplo place; there is nothing in Unitarianism for which it has not abandant welcome; the Episcopalianism of the city would almost die withoat its stout hand; Judaism is constantly enjoying its numerous columns; and, at least of late, Pius IX., Vicar of Christ, is devotedly pervading all its activity. The only religion which the Herald does not support is the "Affin. ities." With this filthy production of most bestial hearts and befouled intelligence tho Herald has nothing whatever to do. With this explanation riding on its baek, we admit the claim of the Herald to be the leading religious paper in the United States.

## [From the Toronto Leader.]

The British government, in the opinion of the New York Herald, has been too penurious in its foeble attempts on behalf of Dr. Livingstone, and therefore that enterprising journal has seen fit to do what that government has failed to do. They publish a letter from their own special explorer, who is on the track of the celebrated Africau traveler, and who says: "If the doctor is at Cjijij in ono month more, and I shall see him, then the race for lhome will begin ;" but that "until I hear more of him or seo the long-absent old man face to face, I bid you a farewell. Bat, wherever he is, be sure I shall not gire up the chase." There is consolation in knowing that a correspondent of the New York Heprald is on his way to interview the doctor, and we shall gladly hear the result should he be successful.

Example.-To find the number of days from the 10 th of May to the 10 th of October following. Find May in the first colnmn, and then in a line with that under ()ctober, is 153 days. If from the 10 th of May to the 25 th of October it would be 15 days more, or 168 days; but if from the 10 th of May to the 1st of October, it wonld be 10 days less, or 143 days. In leap-year, when the last day of February is included between the two dates, there will be one day more than by the table.

## (0)rimat c゙atmarg.

China. - The Chinese civil year is lnnar, and consists of 12 months of 29 and 30 days alternately. In every three years a thirteenth month is added to accommodate the variations of the solar and lunar years. But this is nol entirely effected by such an arrangement, conseqnently the Chinese have a cycle of 60 years, in which period 22 intercalary months occur. The superstitions of that nation render the almanac of the ntmost importance, as it contains a statement of "lucky and unlucky days," in a manner somewhat resembling the impudent impostures of the same kind sold in our own country. The year is divided into 24 periods, corresponding to the position of the smn, at its entrance into and at the middle of cach sign of the Zodiac.

JAPAN.-As in Cbina, the almanac is one of the most important works pnblished in Japan. The year is divided into 12 months, corresponding to the twelve signs of the Zodiac. The months, how-
ever, vary in length, and the Mikado, or Religions Emperor, assigns the necessary intercalary days, and the months that have to be added to accommodate the variation of the solar and lunar years. The division of daily time is effected in a curious manner, a peculiar sacredness attaching to the number nine.
Hinde.- In this calendar the lnni-solar year is employed for the regnlation of festivals and domestic arrangements. The year commences at the instant of the conjunction of the sun and monn in the sidereal month Chaitra. The month consists of 30 Tithis or lnnar days, and is divided into two equal parts of 15 Tithis each, corresponding with the increase and decrease of the inoon in regard to its brightness; but in different parts of India varintions of this method occur, to make up deficiencies, etc., that arise in the annual, or successive annual calendar in regard to intercalary days.

## from the formation of the ©oxermment.

## By a New Method of Life Assurance,

More favorable results than any hitherto experienced may be enjoyed by persons possessed of constitutional longevity, who keep their policies in force until the middle or latter part of their lives. These results are obtained by a novel application of the Tontine principle to the distribution of dividends, and by allowing the assured to sell his Policy to the Company only after stated periods.

## THE NEW

## TONTINE SAVINGS FUND POLICY

Is based on the above conditions, and presents the following distinguishing features, which are illustrated by a calculation of probable results on a Policy of Ten Thousand Dollars, at ORDINARY LIFE Rates, Age 37, Annual Premium, -
$\$ 281.70$

## First-Sale of Policy to the Company.

At the end of 10 years - - 104 per cent. of premiums returned.

| " | " | 15 | " | - | - | -151 | " | " |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  | Second-Paid-up Policy. |  |  |  |  |  |

Third-an Annuity.
At the end of 15 years the profits will extinguish the annual premium, and, with the subsequent Annual Dividends, will purchase a yearly income of
Or, at the end of 20 years, of
647.40

These estimates are derived from a careful digest of past experience, and are endorsed by

## SHEPPARD HOMANS, <br> Consulting Actuary.

Prsors intending to assure their lives will find it to their advantage to examine this new plan with care. Documents giving full particulars of the rules of the Company with regard to the issue of the above Savings Fund Policy, extended Tables of Rates, and other interesting matter, may be obtained by application to the

## EQUITABLE LIFE ASSURANCE SOCIETY, 120 Broadway, New York,

Or any of its representatives throughout the U. S. and Canada.

## No. 5 Nassau Street, New York.

Deposit Accounts of Danks, Bankers, and others received, on which we allow interest at the rate of four per cent. per annum. Checks drawn on us are payable on presentation, without notice, the same as at a National Bank.

Certificates of Deposit, bearing interest at special rates to be agreed upon, will be issued to Savings Banks, Institutions, Trustees of Estates, and others having sums of money awaiting irvestment.

We make Collections on all points of the United States and Canada, and issue Certificates of Deposit available in all parts of the Union.

We buy and sell, at current rates, all classes of Government Securities.
We buy and sell, at the Stock Exchange, Investment Stocks and Bonds, on commission, for cash.

We continue to buy and sell the Bonds of the Central Pacific Railroad Company, issued upon the Main Line of their Railroad and its Branches.

As Financial Agents for the Chesapeake and Ohio Railroad Company, we are now ofering the last of their Fifteen Million Six-Per-Cent. GOLD LOAN, secured by mortgage on their whole railroad property and franchises-a superior security, with good income and marketable advantages. Bonds can be had, Coupon or Registered; they are of $\$ 1,000, \$ 500$ and $\$ 100$ each; run 30 years; Principal and Interest (May and November) payable in coin, in New York City. We recommend them to our friends and customers desiring safe investments.

Communications and inquiries, by mail or telegraph, will receive prompt and careful attention.

FISK \& HATCH.
HARVEY FISK.
A. S. HATCH.

a. The charge on newspapers to Belgium, the Netherlands, the North German Union, or via the Nort'? German Union to countries beyond, and to Italy and Switzerland, increases a single rate for every four ounces in weight.
$b$. Where the letter $b$ is prefixed, an additional rate is to be added to the foreign portion of the postage for each 4 ounces or fraction thereof, if the newspaper exceeds 4 ounces in weight. The foreign nostace. in each case, is ascertained by deducting from the amount set down the sum of 2 cents, which is the United States portion of the postage on a single newspaper, regard!ess of weight. In all other cases, the postage is for aach newspaper without regard to its weight, when sent in Briti h mail.
c. All matter sent by this route mast be plainly inscribed with the name of route.
d. German mail, via Brindisi direct, not over $1 \frac{1}{4}$ oz., fie.; not over 2 $2 / 2 \mathrm{oz}$., ?c. ; not over $3, \frac{1}{4}$ oz., 12c. Via England and Brindisi, not over 11/4 oz.. Te. ; not over $\stackrel{3}{2} 2 \mathrm{oz}$. 10 c . ; not over $3,3 \mathrm{y}$ oz., 12c.
e. Indicates that in cases where it is prefixed, unless the letter be reristered, prepayment is optional; in all other eases, prepayment is required.
 15 c . Via England and Trieste, not over $11 / 2 \mathrm{oz}$., Sc.; not over $21 / 2 \mathrm{oz}$., 12 e .; not over $33 / 4 \mathrm{oz} ., 1 \mathrm{icc}$.
g. German mail, via Brindisi direct, not over $1 \frac{14}{4}$ oz., 5e.: not over $2 \frac{1 / 2}{}$ oz., ic.; not over $33 / 4 \mathrm{oz}$. 9c. Via England and Brindisi, not over 11/4 oz., 6c.; not over $2 \not / 2$ oz., Se.; not over 33; oz., 10c.
$h$. Not over $11 / 3 \mathrm{oz}$.. 5 c . ; over $11 / 3 \mathrm{oz}$. and not over $2 \frac{2}{3} \mathrm{ez}$., fie. over $2^{2} \frac{1}{3} \mathrm{oz}$. and not over 4 oz . Gc
i. Open mail to England 4e. per $1 /$ oz., prepayment optional. Via England: Fur $1 / 3$ oz and under, 10 c ; over $1 / 3$ and not over $1 / 2 \mathrm{oz} ., 16 \mathrm{c}$.; over $1 / 2$ and not $\frac{2}{3} \mathrm{oz}$., 2 nc. ; over $2 / 3 \mathrm{oz}$. and not over 1 oz .. 2'ic. ; prepayment compulsory
k. Lettors, if unpaid, or insumfiently paid. are subject to a fine on delivery, in addition to the deffeient postage. Other matter insufficiently paid is also forwarded (but not if wholly unpaid', subject to a sinilar fine, when addressed to Holland, Belgium, Switzerland, or Italy; but no other mitter than leiters will be forwarded to Great Britain, Ireland, or North German Union, or if iutended to be sent via the North German Union, unless fully prepaid.
2. In consequence of the non-existence at present of any postal convention between the United States and French Post Departments, no rates "by French mail" can be inserted in the table, and postmasters will cease to charge the rates formerly published as chargeable on matter sent by that route.
$m$. The following are the rates of postage on newspapers aud other printed matter to Erazil, via American packet, prepayment compulsory: Newpapers, $2 c$. for each 4 oz . or fraction thereof, and 1c. in addition for each newspaper; other printed matter, except books and circulars, 2 c . for each 4 oz . or fraction thereof, and in addition 1c. for each oz. ; books, 4 c . per 4 oz . or fraction thereof, and in addition 1c. for each oz ; circulars, 2c. for three or any less number, and in addition 1c. for each oz. The regular domestic rates will be charged on delivery on a! newspapers and other printed matter arriving here from Brazil by this route
$n$. The following are the rates of letter postage to Spain, Gibraltar, the Canary and Balearic Isles, via Belgium. On letters for Spain (except Gibraltar) and her possessions, including the Canaries and Balearic Isles, when not exceeding $1 / 3 \mathrm{oz}$., 16 c .; exceeaing $1 / 3$ but not over $1 / 2 \mathrm{oz}$., 22 c .; over $1 / 2$ but not exceeding $2 / 3 \mathrm{oz} ., 3 \geq \mathrm{c}$.; over $2 / 3$ but not exceeding 1 oz., 38 c .; and the same charges and progression for each succeeding ounce or fraction thereof; prepayment optional. On letters to Gibraltar of $1 / 3 \mathrm{oz}$. or under, 18 c .; over $1 / 3$ but not exceeding $1 / 2 \mathrm{oz} ., 26 \mathrm{c}$.; exceeding $1 / 2$ but not over $2 / 3$ oz., 36 c .: over $2 / 3$ but not exceeding $1 \mathrm{oz}, 44 \mathrm{c}$., and the like charges for each additional ounce or specified part thereof; prepayment optional. To Spain and the Canary Islands, via Marseilles, the rates are as follows: For not over $1 / 3 \mathrm{oz}$., 16c.; over $1 / 3$ and not over $1 / 2 \mathrm{oz}$., 2sc.; over $1 / 2 \mathrm{oz}$. and not over $2 / 3$ oz., 32 c .; over $2 / 3$ and not over 1 oz . 44 c .
o. Small newspapers, under 2 oz ., 3c. each by closed mail via England.
p. Not over $11 / 3 \mathrm{oz} ., 5 \mathrm{c}$.; over $11 / 3 \mathrm{oz}$. and not over $22 / 3$ oz.. Gc.; over $22 / 3 \mathrm{oz}$. and not over 4 oz ., ic.
q. Via Belgium, not over $11 / 3 \mathrm{oz}$., 6 c .; over $11 / 3 \mathrm{oz}$. and not over $2 \frac{2}{3} \mathrm{oz}$., 8 cc .; over $2 \frac{2}{3}$ and not over $4 \mathrm{oz} ., 10 \mathrm{c}$.

## dost-(1)ffice statistics.

The following statistics, compiled from official data just completed, exhibit the large increase in the business of the Post-Oftice Department which has been going on for several years, and is still in progress:

Number of post-offices established during the last fiscal year.

2,407
854
Number of post-ofllees discontinued
Increase
Number of post-offices in the United States, June 30,18i0.

1,553

June 30, 1571

Number of Presidential offices (i.e., offices with salaries of $\$ 1,000$ per annum and over), Jane 30, 1570 $\qquad$
Number of do. do., June 30, 1571............. 1,173
Increase....... ........................ 79
The highest number of post-offices before the present year was in 1859, when there were.

28,539

## MAIL AND POSTAL GUIDE.

The Money Order convention between the United States and Great Britain having established on a satisfactory basis a system of exchange of Money Orders between the two countries, we publish below the main points of interest connected therewith-an alphabetical list of the Money Order Post Offices in England and Wales, in Ircland and Scotland, with a table showing the rate of exchanges on Money Orders between the United States and the principal countries in Europe.

Rate of Exchange Between the United States and Great Britain.
The rate of Exchange has been fixed at \$4 86, in gold, per pound, sterling, and the Fees (payable in Currency) for drawing the Orders are as follows:

United States Treasury Notes or National Bank Notes only received or paid.
When making application for a Money Order, the applicant must state whether the Post Office is in England, Wales, Scotland, or Ireland, the general designation of "Great Britain" not being sufticiently definite.

SWITZEFLAND.
Money Orders will be drawn payable at any Post Office in Switzerland. The United States and Exchange Fees are as follows:

Exchange Fees. United States Fees.
For $\$ 20$ or less (currency), 20 cents, gold, and 10 cents, currency.
For $\$ 20$ to $\$ 30$ "
$\begin{array}{lllll}30 \text { cents, } \\ 40 \text { cents, } & \text { " } & 15 & \text { " } & \text { " } \\ 50 & \text { " } & & \end{array}$ $\begin{array}{llllll}\text { For } \$ 30 \text { to } & 40 & 6 & 40 \text { cents, } & \text { " } & \text { " } \\ \text { For } \$ 40 \text { to } & 20 & \text { " } & \text { " } \\ 50 & 50 \text { cents, } & \text { " } & 25 & \text { " } & \text { " }\end{array}$
The Swiss Fees, to be collected on payment of the Order, are:
20 centimes, or 4 cents, oll Orders not exceeding 100 francs.
30 " 30 " 6 " from 100 francs to 200 francs.
These Swiss charges can be included in the Order, so that the desired amount will be paid in full.
The equivalent of One Dollar, gold, is Five Francs and Fifteen Centimes.

## OTHER COUNTRIES via SWITZERLAND.

Orders may be sent via Switzerland to
FRANCE, the forwarding fee is 75 centimes, or 15 cents, for every 100 francs or fraction of 100 francs; ITALY. the forwarding fee being 75 centimes, or 15 cents, for every 100 liras, or fraction of 100 liras; HOLLAND, or the NETHERLANDS, the forwarding fee being 4 cents for every 10 francs, or 4 florins, 72 cents.
BELGIUM, the forwarding fee charged is 50 centimes, or 10 cents, for Order not exceeding 100 francs ; and 100 centimes, or 20 cents, for Order over 100 francs, but not over 200 francs; the equivalent of One Dollar, Gold, is Five Francs Fifteen Centimes.
GERMAN EMPIRE, the forwarding fee charged is 14 kr ., or 4 sgr ., or 10 cents, for every $433 / 4$ florins, or 25 thaler.
When applying for Orders in the above Countries, via Switzerland, the applicant must give every possible detail concerning the Address, Town, County, Province, Department, Country, etc., etc. A simple error or omission, or wrong spelling of names, may cause a delay which will be unpleasant and unprofitable.

## Money Order Post Ofices in Great Britain and Ireland. explanation of the following list.

Where a name stands alone, the place is a Post Town. where the office is a Head Office.
Where two names are given, (as "Abbey-Town; Carlisle") the office at the first is a Sub-Ofice, and that at the second the Head Office, to which the Sub-Office is subordinate-both of these names must be given when addressing an Order; or when two names are given, the second of which is in parenthesis, the first name is a Head Office, the second the County-in either of these cases both names must be written.

Where three names are given, the third in a parenthesis, the first is a Sub-Office, the second is the Head Office, and the third is the County-the, three names must be written in addressing an Order.

## ENGLAND AND WALES.

Abbey-Town ; Carlisle. Abbots Bromley; Rugeley. Abbotsbury; Dorchester.

## The derad Eiviugstoue Expaditious.

Few events in the history of explorations or expeditions, in furtherance of the interests of science and art, or for the extension of knowledge in any direction, created such universal interest, or elicited such general admiration, as the account (first given to the world in the columns of the New York Herald of December 22, 1871) of the existence and earliest operations of the Herald expedition in quest of the greatest traveler and explorer of modern times, Dr. Livingstone. Two years before the date of that letter, the proprietor of the New York Herald had given instructions to the previously long-tried and well-proved head of the expedition to prepare himself for the very acme of all his past exploits-an expedition into the very heart, and perhaps to the very furthest limits, of the African continent, in search of the lost Livingstone. The instructions he receired, and his preparations for the great work before him, are very briefly told, but with points of interest that open out volumes of travel and adrenture to the imagination.

The letter is in itself, perhaps, one of the most interesting specimens of journalistic literature ever published. It is a narrative of the incidents of the earlier portions of the journey by the expedition, and is in a wonderful degree excitative of that world-wide interest which now attaches, and will attach, to the expedition to the end.
That letter we publish in the Herald almanac, convinced that in turning over its pages of information, its useful tables and interesting records, the eye of the reader will light with pleasure on its reproduction here.
We introduce it with the last feeling and emphatic words of its closing paragraph specially addressed to the editor of the New York Herald, by the writer, the head of the expedition.
"Until I hear more of him, or see the long-absent old man face to face, I bid you a farewell; but wherever he is, be sure I shall not give up the chase. If alive, you shall hear what he has to say; if dead, I will find and bring his bones to you."

## Kwihaba, District of Unyanymmbe, $\}$ <br> July 4, 1871.

Yonr expedition, sent ont under me, has arrived in Unyanyembe. Were yon living at Zanzibar or on the East A frican coast, you would have a much better idea what the above few words meant than yon have now. You would know, without any explanation, that it had traveled $5251 / 2$ miles, and if you heard that we had traveled that great distance within cighty-two days-a littlo under three months-you would at once know that we had marched it in a very short time; bnt since you and your readers live in America, I must return to the Island of Zanzibar, close to the coast of East Africa, whence we started, and give you a brief summary of the incidents and misfortunes which befell us througliout the march.

## FIRST INSTIUCTIONS.

The instructions which $I$ received from you close on tro years ago were given with the usual brevity of the HuradD. They were, "Find out Livingstone, and get what news you can relating to his discoverics." But, before sceking Livingstone in the unkuown wilds of Africa, I had other orders to fulfill which you had given me. I had to be present at the inauguration of the Suez Canal: I had to ascend the Nile to the first cataract; I had to write full accounts of what I had seen and what was donc-a guide to Lower and Upper Egypt. From Egypt I was instructed to go to Jerusalem ; write up what Warren was discorering under that famous city; thence $I$ had to proceed to the Crimea, Thence I was to send to you descriptions of Sebastopol as it stands to-day, of the graveyards in and abont it, of the battlefields where Encland and France met Russia in the shock of war. This done, I had to travel through the Cancasns, visit Turke. stan, find out what Stoletoff and the Russians were doing towards the conqnest of the Oxias rallcy, and then advance towards India. Next I had to trarel through the length of Persia, and write about
the Euphrates valley, the railroad that has been on the tapis so long, and its prospects. Lastly, I had to sail to the African coast, and, according as circumstances guided me,

## seek out livingstone,

and ascertain from him what discoveries he had made-only such facts as he would be pleased to give to one who had made sucll efforts to reach him. Qnickly and briefly as the instructions were given by you, their performance reipured time and a large expenditure of money. What I have already accomplished has required ninetcen months.

## AT ZANZIBAR.

I arrived at Zanzibar on the 6th of January of this year, and at once set about making the nccessary inquiries from parties who ought to know about the whereabouts of Dr. Livingstone. The most that I could glean was that he was in the neigliborhood of Ujiji, which was a little over 900 miles from the coast. It would nerer do to return to Bombay or Aden with such scanty and rague news after the time and money expended in rcaching Zanzibar. Why, all the world kucw, or supposed such to be the fact. What was I to do? Go, by all mosns, and never to return unless I could better such information. Go I did.

## ORGANIZING AN EXPEDITION.

It occupied me a month to purchase such things as were necessary, and to orgauize an expedition to collect such information as would be useful to mo on the long march, and would guide me in the new splere in which I found myself. The expense which you were incurring frifhtencd me consider; ably; but then "obey orders if yon break owners" is a proverb among sailors, and one which I adopted. Besides, I was too far from the telcgraph to notify you of such an expense or to receive further orders from yon; the preparations for the ex. pedition therefore went on. Eight thousand dol-
lars were expended in purchasing the cloth, beads, aud wire necessary in my dealings with the sarages of the territories through which I would have to traverse. As each tribe has its peculiar choice of cloth, beads, and wire, much care was to be bestowed in the selection and arrangement of these things; also one had to be careful that an over great quantity of any one kind of cloth or beads should not be purchased, otherwise such things would soon become a mere impediment of travel and cause a waste of money. The rarious kinds of beads required great time to learn, for the women of A frica are as fastidious in their tastes for bends as the women of New York are for jewelry. The measures also had to be mastered, which, secing that it was an entirely new business in which I was engaged, were rather complicated, and perplexed me considerably for a time.

## the military force.

These things haring been purchased, arranged and adjusted in bales and packages, there remained for me to raise a small company of faithful men, who should act as soldiers, guards to the caravan, and servants when necessary. Some of Speke's faithfuls and Burton's soldiers yet lived in Zanzibar. These were found out by Johari, the American Consul's dragoman, and, as they were willing to accompany me, were immediately engaged. Bombay, the honestest of blackmen, who served with Burton, and subsequently with Speke, was commissioned captain and ordered to collect a company of twenty men, in which he succeeded most admirably. All these men are with me today. I could not hare been better served by any set. of men than I have been by these faithful people. By twos and threes I sent them out with the carriers as they were collected, and entrusted to them my bales of cloth, bags of beads, and coils of wire, which you must recollect are as gold, silver, and copper money in Africa. Three months afterwards I found every bale, every bag of beads, every coil of wire in Unyanyembe, $5251 / 2$ miles from Bagomoyo, their initial point on the African coast.

## ARMS

were purchased for these men who were to be my soldiers; a musket, a hatchet, a knife, a shot-pouch and powder-flask, flints, bullets, and powder were to be served out to each man. Then there were cooking utensils and dishes, tents to cover the property during the rainy season, which was fast approaching, to be required. In order to guard against

## CONTINGENCIES,

such contingencies as might very possibly arise, viz.: lack of carriers on tho coast, one very grave one, I was obliged to purchase twenty-five donkers, in which task I had to be carcful lest any worthless animals might be passed on me. Twenty-fire saddles for the donkeys had to be manufactured by myself, or by such men as could understand what kind of saddles I nceded, for there were nothing of the kind obtainable at Zanzibar.

To assist me in such work, and in tasks of similar nature, I hired two white men, sailors, who had been mates of ships-one an Englishman and the other a Scotchman-and having cut the canvas for the saddles, and cloth for the tents, gave to these practical men the task to sew them up. After they had finished their work I re-engaged them to accompany me to Africa, to fill the respective duties of first and second mates. As I had the success of

## the new york herald expedition

near and dear to my heart, constant thinking about it, and the contingencies that might arise to prerent its success, over and over, I had long sketched its march from the sea coast to Ujiji, and kuew almost as well as if I had been there before what
kind of difficulties I should meet. The following is one of my sketches made on board ship while coming to Zanzibar:

## CALCULATIONS AND REFLECTIONS.

"One hundred pagazis will be required to conrey cloth, beads, and wire enough to kcep me and my soldiers for one year, and to pay expenses, such as hire of fresh pagazis, \&c. ; twenty men, to act as guards or soldiers; fifty bales of cloth, ten bags of beads, and five loads of wire, for food and pagazi hire. In three months I will try to reach Unyamyembe. Shall stop in Unyanyembe two weeks probably. From Unyanyembe is one month's march to Ujiji, on the Tanganyika Lake. And after!- Where is Livingstone? If Livingstone is at Ujiji my work is casy. I will get what information I can and return to Uyanyembe. The race is now for the telegraph. It is three months to Zanzibar, and from Zauzibar, as I was three months coming to Zanzibar from Bombay, I may be three months going from Zanzibar to Bombay. That will not do. We will try another road. To Lake Victoria N'Yanza from Unyanyembe is twenty-six days. By boat to Uganda would be fifteen days. From Uganda to Gondokoro twenty days. From Gondokoro by Dahabech down the Nile to Cairo forty or fifty days. I have then the telegraph from Unyanyembe to Eombay from fire to six months, from Unyanyembe three to four months. The latter route is the best by far.
"A gain I have reached Ujiji. Where is Living. stone? He may be in Maruugu, Ubembe, Ugahha, Usige, Urundi, or somewhere else on the other side of the Lake Tanganyika. Shall I expose my mission, which requires speed, to the caprice of a king Kanuena, or a Hamed Bin Sulayyam? No. I shall take my own boat from Zanzibar, carry it with me to Ujiji, aud with it search its coast from Ujiji to Maruugu, Marungu to Usige, Usige to Ujiji, for the long absent Livingstone, and the same boat shall carry me from Muanza, at the southern extremity of the lake, to the Ripon Falls, the point where the Nile issues out of the N'Yanza."

## THE BOATS OF THE EXPEDITION.

This was one of many sketches I made, and the one I adopted for my guidance. I purchased two boats in Zanzibar-one twenty-fire feet long and six 1 et wide, the other ten feet long aud four and a half feet wide. I stripped them of their boards, and packed up the timbers, or ribs, with a few of the boards, keel, stem and stern pieces, thwarts; and knees, which should be screwed together as the boat was required, and covered with doulle canvas skins well tarred. These were my boats, and haring such men as sailors with me, I doubted not but they could be made to answer. In the absence of anything better they must be made to answer.

## before leaving zanzibar

Captain Fraucis R. Webb, United States Consul, introduced me to Sycd Barghash, Sultan of Zanzibar and Pemba. After a very kiud reception, besides furnishing me with letters to Said Bin Salim (formerly Ras Cafilah to Benton), now Gorernor of Unyanyembe, and Sheikh Bin Nasib, and to all his Arab subjects, he presented me with an Arah horse. Mr. Goodhue, an American gentleman, residing at Zanzibar, also made me a present of a blooded horse, imported from the Cape of Good Hope. To the other American fentlemen-Mr. Spalding, Mr. Morse, and Mr. Sparhawk-I am indebted for many courtesies, but more particularly to Captain Webb and Mrs. Webb, whose many kindnesses were innumerable. It was at Captain Webb's house I lived for a month, and during that time his forbearance knew no bounds; for, as you may imagine, I littered $h_{i} z$ house with tons upon tons of bulky material of cloth, beads, wire, tar, canvas, tents, utensils, and a thousand other things.

## THE DEPARTURE FROM ZANZIBAR.

On the morning of the 5th of February, one month after arrival at Zanzibar, a fleet of dhows bore the expedition and its effects from the Island of Zanzibar to Bagomoyo, on the main land, distant about twenty-five miles from the island. We were

## detained at bagomoyo

nearly two months for lack of sufficient pagazis; but as fast $a$; they were obtained a small number was at once fitted out and despatched to the interior under guard of two or threc soldiers. But despite the utmost efforts, and double prices which I paid in order to induce the pagazis or carriers, the collecting together of over a hundred men proceeded but slowly. The reason of this was that the cholera, which last year desolated Zanzibar and the coast, had frightened the Oranyamuezi from coming to a place where they were almost certain to meet their fate. They were but just recovering from the cffects of their fear when the expedition disembarked at Bagomoyo.

## the pagazis of the land of the moon.

As I must employ the word pagazi often in this letter, 1 had best explain what the word means. A pagazi is a Kinyamuezi word for "carrier"-one who carries ivory or any other goods on his shoulders. This uscful person is the camel, the horse, the mule, the ass, the train, the wagon, and the cart of East and Central Africa. Without him Salem would not obtain her ivory, Boston and New York their A frican ebony, their frankincense, myrrh, and gnm copal. He travels regions where the camel could not entcr, and where the horse and the ass could not live. He carries the maximum weight of seventy pounds on his shoulders from Bagomoyo to Unyanyembe, where he belongs, for which he charges from fiftcen doti to twenty-five doti of Ameriean sheeting or Indian calico, dyed blue, called kam ki, mixed with other cloths, imported from Muscat and Cutch, equal to from $\$ 750$ to $\$ 1250$. He is, therefore, very expensive to a traveler. For the carriage of my goods I had to disburse nearly two thonsand dollars' worth of cloth. The pagazi belongs to Unyanmezi (Land of the Moon), an extensive country in Central Africa, in which Unyanyenne, the central depot of the Arabs, is situated, and which all caravans for the interior must reach, and where they must obtain fresh relays of carriers before they can proceed further. The doti in which he is paid, and which is equivalent to his dollar, measures four yards. A shukka is half a doti, or two yards. The proprietor of a caravan purchases his cloth by the bale, or gorah. A gorah of Merikani (a corrupted name for American shecting) means a piece of Merikani of thirty yards, into which they are folded up by the mills of Salem and Nashua, N. H. The gorah, therefore, contains seven and a half doti, or fifteen shukka.

## two months at bagomoyo.

During the two months we were halted at Bagomoyo there was plenty of work for us. The eight thousand yards of American sheeting which I had purchased had to be made into bales for the pagazis. A bale is a package of cloth weighing not more than seventy pounds, wherein pieces of American sheeting must be laid in layers alternately with the cloths of India, Cutch and Muscat; so that if one bale or two are lost yon do not lose too much of one thing, which might by and by prove fatal to your enterprise. When the cloths are thns laid in alternate layers and the scalc indicates the maximnm weight of a doti cloth spread ont receives them, and after being tied or pinned over it ncatly
it is then bound as firmly as possible with coir rope and pounded by two men nntil the bale is one solid roll, three and a half feet long, a foot wide, and a foot deep. It is then taken and putin a makarda, or a mat bag, nntil the pagazi, coming for his load and hire credles it in three long sticks arranged in a fork to receive it, and binds the fork firmly on the bale, for the purpose of protecting the bale from injury from wet, moistnre, and white ants, and for the convenience of lifting, it on his shoulder and stacking it when his day's march is over. Beads are placed in long, narrow backs of domestics, and not more than sixty-two pounds are put in the bag, as the bead load is not so flexible as the cloth bale. Wire is conreyed in coils-six coils generally considered a handsome load-areraging sixty pounds. It is arranged for carriage, in thrce coils, at each end of a fire-foot pole.

## LIFE AT BAGOMOYO.

My life at Zanzibar I thought hard, but my two months et Bagomoyo a eonvict at Sing Sing would not have envied. It was work all day, thinking all night; not an hour could I call my own. It was a steady grind on body and brain this work of starting. I state with truth, now resting at Unyanyembe, after the fatigues of the long march, after the dangers and vexations we have suffered, that I would prefer the three months' march, with all its horrors, anxieties, swamps and fevers, to the two months' preparation for the expedition I had at Bagomoyo. The greatest tronble of all that I had endured at Bagomoyo-I am sure you will smile at the thonght-was with my agent, who obtained me my pagazis, without whom I could not hare started even to this day, probably never; for had I stayed so long I would hare thrown un the job as impracticable and would have commftted suicide by putting my head in a barrel of sand, which I imagine to be a most easy death, and one I gratuitously recommend to all would-be suicides. Smile now, please, when I tell you that his name was

## SOOR HADJI PALLOO,

and his age nineteen. During my whole stay at Bagomoyo this young - gave me more trouble than all the scoundrelism of the city of New York gives to its Chief of Police. Half-a-dozen times a day I found him in dishonesty, yet the boy was in no way abashed by it; otherwise there had been hopes for him. Each day he conceired a new system of roguery. Every instant of bis time scemed to be deroted to derising how to plunder me, until I was at my wit's end how to thwart or check him. Exposure before the people brought no shame to his cheeks. A mere shrug of the shonlders, which I was to interpret any way I pleased, was the only proof he gave that he heard me. A threat to reance his present had no effect on him-"a bird in the hand was worth two in the bnsh;" so \$10 worth of goods stolen from me was worth a promise of $\$ 20$ when his work should be finished. Sereral times a day the young Hindoo dog escaped a sound thrashing because I knew his equal for collecting pagazis was not to be found. Will you believe it, that after the most incomparable rascality, at the end of two months he had escaped a flogging and reeeived a present of money for his services? The reason was, at last he had released me from torment, and I was free to $g o$.

## FREE TO GO!

The convict free to go after a protracted imprison-ment-the condemned man on the scaffold, with the awful cord dangling before his eycs, the executioners of the dread sentence of the law ready to perform their duties, when told he was at liberty to depart, could not feel keener pleasure than I felt when my bnsiness was concluded with Soor Hadji Palloo and I felt myself at liberty to depart on my
mission. Five caravans had already been dis-patched-four under the protection of soldiers, the fifth under the Scotecman who acted as my first mate. The sixth and last was to be led by myself. Burton and Speke arrived at Zanzibar in 1857, in January-the same month that I, fourteen years later, had arrived. But as the masika, or rainy season, which lasts for forty days, was then - draw. ing near, they preferred to wait on the coast and defer their departure until after the masika. It was not until the 16th June that they left Zanzibar for Kaele (three miles below Bagomoyo), and not until the 27th of the same month that they made the great start, the pagazis, soldicrs and donkeys having been collected for them by Ladha Dalyec, the most influential man in Zanzibar, second only to the Sultan of the island. But my mission was one that required speed; any delay would render it valueless ; immediate departure was essential to suc-cess-departure from the coast-after which my movements would depend in a great measure on my own energy. Forty days' rain and a 200 mile swamp must not prevent the New York Herald correspondent from marehing, now that the caravan is ready.

## ontard.

On Saturday, the 1st of April, exactly eightythree days after arrival at Zanzibar, the sixth caravan, led by myself, left the town of Bagomoyo for our first journey westward, with "Forward" for its mot de guct and the American flag borne aloft by the Kirangozi or guide of the caravan. As it defiled out of the town, we bid a long farewell to the dolce far niente of civilization, to the blue sea and its open road to home, and to the hundreds of dusky spectators who were gathered to witness our departure with repeated salvos of musketry.

## the expedition on the march.

The earavan which $I$ led consisted of ten pagazis carrying the boats; nine soldiers, under Captain Bombay, in charge of seventeen donkers and their loads; Selim, my boy interpreter; a Christian $\Delta$ rab from Jerusalem, who had been with me through Persia; one cook and sub from Malabar, and Shaw, the English sailor, now transformed into a rear guard and overseer, mounted on a good riding donKey; one dog from Bombay, called Omar, from his Turkish origin, who was to guard my tent at night and bark at insolent wagogo, if not to bite their legs-a thing he is very likely to do-and lastly, myself, mountell on the splendid bay horse given me by Mr. Goodhue, the mtongi leader, the thinker and reporter of the expedition. Altogether,

## the expedition numbers

threo white men, twenty-two soldiers, four supernumeraries, with a transport train of eighty-two pagazis, twenty-seven donkeys, and two horses, conveying fifty-two bales of cloth, seven man-loads of wire, sixteen man-loads of beads, twenty loads of boat fixtures, three loads of tents, four loads of clothes and personal baggage, two loads of cooking utensils and dishes, one load of medicines, three of powder, five of bullets, small shot, and metallic eartridges, three of instruments and small necessaries, such as soap, sugar, ten. coffeo, Liebig's extract of meat, penmican, candles, etc.. which make a total of 116 loads-equal to eight and $a$ half tons of material.

## THE WEAPONS OF DEFENCE

Which the experition possesses consist of one double barrelled emooth bore, No. 12, two A merican Winchester rifles or "sixteen-shooters," two Starr's breech-londing curbines, one Jocelvn brecech-loader, one elephant rifle, carrying balls eight to the pound; two brecel-londing revolvers, twenty-four
fint-lock muskets, six single-barreled pistols, one battle-axe, two swords, two daggers, one boar spear, two Anerican axes, twenty-four hatchets, and twenty-four long knives.

## fitted up with cart.

The expedition has been fitted up with care ; whatever was needed for its success was not stinted; everything was provided; nothing was done too hurriedly, yet everything was purchased, oollected, manufactured and compounded with the utmost despatch, consistent with efficiency and means. Should it fail of success in its errand of rapid marching to Ujiji and back, it must simplý happen from an accident which could not be controlled. So much for the personnel of the expedition and its purpose.

## the whitr man's caravan.

We left Bagomoyo, the attraction of all the curious, with noisy eclat, and defiled up a narrow lane shaded to twilight by the dense umbrage of two parallel hedges of muriosas. We were all in the highest spirits-the soldiers sang extempore, the Kirangozi lifted his roice into a loud bellowing note, and fluttered the American flag, which told all on-lookers, "Lo, a musungre's (white man) caravan," and my heart, I thought, palpitated much too quickly for the sobriety of a leader. But I could not help it. The enthusiasm of youth still clung to me despite my traveled rears, my pulses bounded with the full glow of staple health; behind me were the troubles which had harassed me for over two months; with Soor Hadji Palloo I had suid my last word; with the blatant rabble of Banyans, Arabs and Beloochees I had talien my lasi look, and before me beamed the sun of promise as he sped toward the Occident. Loveliness glowed around me as I looked at the fertile fields of manioc, the riant regetation of the tropics, the beautiful, strange trees and flowers, plants and herbs, and heard the cry of pee-wit and cricket and the noisy sibilance of many insects; methought cach and all whispered to me, " $\Delta t$ last you aro started." At such a time what more appropriate could I do than lift up my face toward the pure glassy dome of heaven and cry, "God be thanked!"

## cabped at night on the banks of the kingani.

We camped that night on the banks of the Kingani, our dreams being sadly disturbed by the sportive hippopotami, which cmerged at night for their nocturnal feed on the tall, high grass that grows on the savannas to the westward of the Kingani River.

## morning of the marcil.

"Sofari, Sofrai, leo-a journey, a journey to-day," shouted the Kirangozi as he prepared to blow his kudu horn-the usual signal for a march. "Set out, set out," rang the checry voice of Captain Bombay, cehoed by that of my drum-major, servant, general help and interpreter, Sclim. As I hurried my men to their work, lent a hand with energy to drop the tents, I mentally resolved that if my caravans ahicad gave me clear room for travel I should be in Unyanyembe before that day three months. By six o'clook, A. M., our early breakfast was dispatched, and the pagazis and donkeys were en route for Kikoka. Even at this early hour there was quite a collection of curious natives, to whom we gave the parting " qualary " with sincerity. My bay horse was found to be invaluable for the service of a quartermaster of a transport train, for as such was I compelled to compare myself. I could stay behind until the last straggler had left camp, and by a few moments' gallop put myself at the head of the cararan, leaving the white man Shaw to bring up the rear.

## ON THE ROAD.

The road, as it is throughout Africa, was a mere footpath, leading over a sandy soil of surprising fertility-producing grain a hundred-fold, though the sowing of it might be done in the most unskillful manner. In their fields, at heedless labor, were men and women in the scantiest costumes, compared to which the fig-leaf apparel of our first parents must have been en grande tenue. Nor were they at all abashed by the devouring gaze of men who were strangers to clothcless living men and women; nor did they seem to understand why their inordinate euriosity should be returned with more than interest. They left their work as the Wasungu drew near-such hybrids were they in white flannels, solar topees and horse-boots. But were the Wasungu desirous of studying the principles of comparative cnatomy and plysiology, what a rich field for study! We passed them with serious faces enough, while they giggled and laughed outright, pointing with their index fingers at this or that thing in our dress which to them seemed so strange and bizare.

## A NEW AND STRANGE LAND.

The western side of the Kingani was a considerable improvement upon the eastern. We were traveling over a forest-clad and jungly plain, which heaved upward as smoothly as the beach of a watering-place, culminating at intervals in rounded ridges, whence fair views might be obtained of the new and strange land. The scenery was as beautiful as that which many an English nobleman is proud to call his "park." On the whole it was fawn and sward, with boscage sufficient to agreeably diversify it.

## PASSING KIKOKA,

we trayersed on the next day a young forest of ebony trees, where guinea-fowl were seen, besides pigeons, jays, ibis sacra, golden pheasants, quails, moor-hens, floricans, hawks, eagles, and now and then a solitary pelican winged its way to the distance. As we advanced farther into the interior, antelopes bounded away to our right and left, the steinbok and noble kudu fled in terror, giraffes rus!ed away from us like moving forests, and zebras galloped frantic toward the far horizon at the sound of the strange noises which the caravan made.

## SUNBAHAD.

By Sunday, the 23d of A pril, we had trareled one hundred and twenty-five miles, and had reached Simbawenni, situated in longitude 3742 cast, latitude 620 sonth. We had experienced no trouble on the read up to this place. The country was like that above lescribed-park-like-abounding in large and noble game. Not until we had left Simbawenui did we experience any trouble.

## FIRST TROUBLE.

The first which we experienced was from the Sultana of Simbawenni, in Usagre, which we found to be a large and well-built town, fortified by four towers and a stone wall, haring considerable pretensions to architectural skill. The Sultana sent her embassadors to demand tribute from me. I refuscd to pay, though she possessed three hundred muskits and five hundred slaves, on the ground that as my caravans had paid already I was exempted from it according to her custom. The embassadors retired with a "Ngema"-very well. Soon after passing the town we arrired at Simbo Khombi, and here I was compelled to order my cook to be flogged for his incorrigible dishonesty and waste. Upon leaving Simbo for the wilderness and swamp of Makata I was made aware that the cook had deserted. I dispatched three soldiers in pursuit, who, in the ardor of following his tracks, fell into the hands of the Sultana of Simbawenni,
who robbed them of their guns and put them in chains. Some Arabs happening to sec them in this condition, and knowing they were my men, made haste to inform the Sultana that she did not know what white pcople were capable of doing if they were angered; that I had guns with me that would kill her in her house at the distance of half a mile. This extraordinary announcement caused her to mitigate her anger against me and to release my soldiers, returning one gun and retaining two as just and equitable tribute. The cook was afterwards reported to me to be murdered.

## THE MAKATA SWAMP.

From Simbo to Rebenneko in Usagre extends the terrible Makata swamp, a distance of forty-five miles. It is knee-deep of water and black mire, and for five days we marcled through this cataclysm. From here commenced the

## LIST OF CALAMITIES

which afterwards overtook me. First the white man Shaw caught the terrible fever of East A friea, then the Arab boy Selim, then myself, then the soldiers one by one, and small-pox and dysentery raged among us. As soon as I had recovered from the effects of the fever I was attacked with dysentery, which brought me to the verge of the grave. From a stout and fleshy person, weighing 170 pounds, I was reduced to a skeleton, a mere frame of bone and skin, weighing 130 pounds. two pagazis fell victims to this dysentery. Even the dog "Omar" was attacked by it, and presently died.

## AT REBENNEKO

we experienced the last of the rainy season. It had rained alnost every day since we had left Bagomoyo, but until we had arrived at the verge of the Makata swamp we did not experience much ineonvenience from it.

THE ADVANCE CARAVAN OVERHAULED.
Two days beyond Rebenncko we caught up with the fourth caravan, which had been sent out under the leadership of the Scotchman. I found the white man in a most miserable plight. All the donkeys-numbering nine-that I had sent out with him were dead, and he was attacked by dropsy or elephautiasis-a disease of which he has since died. He had wasted upward of six bales of cloth, fire of which had been entrusted to him to convey to Unyanyembc. An Arab proprietor would hare slaughtered him for his extravagance and imbecility; but I-I had no other course but to relieve him of all eharge of such goods. Had I not foreseen some such mismanagement and provided plenty of cloth against such loss, I should have been compelled to return to the eoast for more bales to replace them.

## EXPLOITS, LOSEES, DISCOVERIES.

By the 24th May we had traveled 278 miles, and had entered the dangerous land of the Wagogo. We had passed through the territories of the Wakami, Wakwere, Wadoe, Wasegura, Wasagara, and Wahehe. We had crossed the rivers Kingani, Ungerengeri, Little Makata, Great Makata, Rudewa and Mukondokwa. We had discovered the sources of the Kingani, Wami, and Mukondokwa rivers and the lake of Ugombo, three miles long by two and a half miles wide. Our losses up to this date werc seventeen donkeys dead, one coil of wire stolen, one tent eaten up by white ants, one tent lost, also one axe, one pistol twenty pounds of bullets, and Captain Bombay's stock of uniform clothes, all of which losses I ascribe to the fatigues experienced during the transit of the Makata swamp. Three pagazis had deserted, two were dead; also one white man and two natives of Malabar had
died. The troo horses died on the third day after learing Bagomoyo, for so fatal is this land to both men and animals.

## in extering ugogo

we were entering a new land, to meet with different dangers, different aceidents from those we had now left behind us. We had ascended a plateau 3,700 to 4,200 feet above the level of the sea; the extraordinary fertility and rivers of the maritime region we should not see in Ugogo, but a bare and sterile plateau, though cultivated by the Wagogo.

## the land of the wagogo.

The Wagogo are the Irish of Africa-clannish and full of fight. To the Wagogo all cararans must pay tribute, the refusal of which is met by an immediate declaration of hostilities. The tribute which I alone paid to these people amounted to 170 doti ( 8170 in gold), for the mere privilege of travel. ing through their eountry to Unyanyembe beyond.

## arrival at unyantembe.

On the thirtieth day after entering. Ugogo we arrived in Unyanyembe, at the Arab rillage of Kwi-hara-so called from the plain of Kwihara, in which it is situated. The mareh of this last month had been very rapid, we having traveled $2471 / 2$ miles, while the previous mareh of 278 miles, viz., from Bagomoyo to Ugogo, had oceupied fifty-four days. Altogether we had traveled $5251 / 2$ miles in cighty-four days, ineluding halts, which makes our rate of mareling per day six and a quarter miles. Burton and Spele traveled the same distanee from Kaole to Unyanyembe in 134 days, whieh is at the rate of three and one-sixth miles per day. You must not imagine that I am stating this in order to mače an in ridious comparison, but simply to show you how expeditiously we have traveled. The Arabs travel the distance from two months and twelve days to four months. On the seeond risit of Speke with Grant to Unyanyembe he made the mareh in 115 days.

## an almost unknown land.

I shonld like to enter into more minute details respeeting this new land, whieh is almost unknown, but the rery nature of my mission, requiring speed and all my energy, preeludes it. Some day, perhaps, the IIfrald will permit me to deseribe more minutely the expericnces of the long mareh, with all its vieissitudes and pleasures, in its columns, and I can assure your readers beforehand that they will not be quite deroid of interest. But now my whole time is occupied in the mareh, and the direetion of the expedition, the neglect of whieh in any one point would be productive of disastrous results.

## news about dr. livingstone.

I shall here proceed to relate what I have heard of Liringstone verbatim.

On the 12th of April I met at Monssoudi, on the Ungerengeri river, four marehes from Senibawenni, Salini bin Rasheed, who gave me the following intelligence respeeting Liringstone:-
"I saw the musungu who eame up from the Nyassa a long time ago, at Ujiji last year. He lived in the next tembe to me. He has a long, white mustaehe and beard, and was very fat. He was then about going to Marangu and Uniema."

## MORE TIDINGS.

On the 18th of May, Sheikh Abdullah bin Wasib found me encamped at Mpwapwa and gave me the following:-
The musungu (white man) has gone to Maniema, a month's march from Ujiji. He has met with a boil accident, having shot himself in the thigh

While out hanting buffalo. When he gets well he will return to Ujiji. There are many lakes on the other side of the Tanganyika. Lake Ujiji is very great; Lake Uruwa is also great, Lake Bangueolo is great, but Lake Maniema is great, exeeedingly great.

## the story of sheik thant.

At Kusuri, in Mgunda Mkhali, or the land of the Wayanzi, on the 13th of June, I met Sheik Thani bin Massoud, who imparted the following:-
"You are asking me about the musungu whom people eall 'Doehter Fellustein' (Dr. Livingstone). Yes; I lived near him about three months at Ujiji. His men have all deserted him, except three slaves, whom he was obliged to buy."
"Why?"
"He used to beat his men very hard if they did not do instantly what he told them. At last they all ran away; no one would stop with him. He had nothing with him, no clothes nor beads, to buy food for a long time ; so he had to go out and hnut buffalo every day. He is a very old man and very fat, too; has a long white bcard. He is a great eater, Mashallah! He would cat a pot of ghee and a bic plateful of riee three or four times a day. Mashallah! but you see this thing (pointing to a tea saucer)?"
"Yes."
"Well he would eat that full of butter, with a potful of ugali (porridge)."

## still another story of livingstone.

On the 16th of June I met Hassan, a Balooch soldier of Sheikh Said bin Salim, of Unyanyembe, who gare news about Livingstone to this effect:-
"He is a very old man, with a beard nearly white. His left shoulder is ont of joint from a fight he had with a suriba (lion). He has gone to Maniema with some Arabs. Maniema is three months' mareh from Ujiji. He is about returning to Tjiji soon, owing to a letter he reeeived from the 'Balyuz' (Consul). They say that although he has been out here so long he has done nothing. He has tifteen bales of cloth at Unyanyembe, not yet sent to him."

## news from dnyanyembe.

On the 20th, at Kubuga, three days from Unyanyembe, Sheikh Amir bin Sultan informed me as fol-lows:-
" Yes, there is a musungu, a very old man, who eame to Ujiji by the way of Lake Nyassa and Cazembe. After eoming to Ujiji he went to Marungu, and then returned to Ujiji. About a year ago he crossed the Tanganyika Lake, and aceompanied some Arabs to Lake Maniema, whieh, I am told, is a very great lake, much larger than Tanyganyika. Lately a earavan eoming from Ukonongo brought the nerrs that he was dead. I don't know whether the news be true cr not."

## addrtional information.

At this plaee I have reeeived the following ad. ditional information: He is on the road to Cjiji from Lake Maniema, whieh is west of Ugubba. The lake is fifteen camps from the Tanganyika, in a south-south-west direetion. With meare going to Ujiji for him fifteen loads of cloth, cight loads of beads, and twelve boxes, containing wine, provi-sions-sueh as sugar, tea, salt, pepper, spiee, s and sueh little luxuries-besides clothes, books, and newspapers. If at Ujiji in one month more I shall see him, the race for home shall begin. Until I hear more of him or see the long-absent old man faee to faee I bid you a farewell; but wherever he is, be sure I shall not give up the chase. If alive, you shall hear what he has to say; if dead, I will find and bring his bones to you.

DOMESTIC．

## MARINERS' GUIDE.

The importance of the information subjoined, under the above head, will be appreciated by all navigators of the seas, by all ship-owners, and by all who do business on the great waters. Every newly discovered danger in mid-ocean, along the sea-coasts, at the entrance of harbors, at the mouths of rivers, with the precautions taken and recommended to guard against the same, that has ween reported for the past year are fully indicated below. The information is entirely official, emanating from the Trinity House Admiralty Office, London; from the Hydrographic Office, Washington; and from the various navigation boards at the different distant ports of the world-all taken from the columns of the New York Herald, the only paper that has ever published-for the use of mariners-this most valuable and interesting information, and now given for the first time in a collated form.

## The New Cautionary Signals.

[A most important step has been taken by the United States Signal Service in the establishing a system of signals by which, at the earliest possible moment. the landsman and the mariner are notified of the approach and force of storms and violent gales of wind. These signals, with full explanatory notes, were first presented to the public in the columns of the Herald of October 21, from which is extracted the eubjoined official text as to the meaning and use of such signals:] the cautionary gignal.
The cautionary signal of the Signal Service, United States Army-a red flag with black square in the center by day and a red light by nightdisplayed at the office of the observer and other prominent places throughout any city signifies:

1. That from the information had at the central office in Washington, a probability of stormy or dangerous weather has been deduced for the port

Day Signal-(Red flag, with black square).
or place at which the cautionary signal is displayed, or in that vicinity.
2. That the danger appears to be so great as to demand precaution on the part of navigators and others interested, such as an examination of vessels or other structures to be endangered by a storm, the inspection of crews, rigging, etc., and general preparation for rough weather.
3. It calls for frequent examination of local harometers and other instruments by ship captains or others interested, and the study of local signs of the weather. as clouds, etc. By this means those who are expert may often be confirmed as to the need of the precaution to which the cautionary signal calls attention. or may determine that the danger is over-estimated or past.

THE WEATYER SIGNALS EXPLAINED.
The signals as displayed from the flagstaffs mean thus:

A red flag or flags, with black square in center, and cylinder on center pole by day, and red lights at night, mean that from information had at the

Night Signal-(Red Lantern).
central office, in Washington, dangerous winds are anticipated for the vicinity of New York city:

Some persons are under the impression that when the crlinder is up without the flags, or rice versa, something else is meant in each case; but this is wrong. There is but one signal comprising all the apparatus.

## COAST OF AFRICA.

## dangerous reef in java sea.

Captain Orchard, of the Peterborough, reports: On Feb. 7, in passing the Java Sca, the Peterborough struck on a coral reef not laid down in the chart, lat. 637 S.. lon. 11558 E., the northernmost small island of the Kancean Group. N.W. by N. distance about 10 or 12 miles, just visible. The shoal appeared to be very narrow, in a north and south direction, but to extend some distance cast and west. The lookout mistook it for the shadow of the sun, and did not report it. The water appeared much shoaler to the eastward of us. The ship at the time was going 9 knots, and was off the reef before we conld get a cast of the lead, no bottom, with 25 fathoms close to it.

TERRA DEL FUEGO-ESTABLISHMENT OF A MISEION STATION IN BEAGLE CHANNEL.-JUNE, 1871.

Information has been communicated by ViceAdmiral Sir B. J. Sullivan. K.C.B., that a Mission Station has been established on the north shore of Eeagle Channel, Terra del Fuego, in the cove
of a small peninsula N. by E. from the Murray Narrows, or northern entrance to Ponsonby Sound and which may be used as a place of refuge and relief to mariners shipwrecked in the vicinity of Cape Horn.
If a ship is wrecked to the westward of Cape Horn, the most direct course for boats is to pass eastward of False Cape Horn and through Ponsonby Sonnd, using Packsaddle Island (where it is considered the natives are to be trusted) for a stopping place, but avoiding communication with natives in Ponsonby Sound until near the north part of it, as they are said to be very hostile.
For crews escaping when to the eastward of Cape Horn, the best course would be to the eastward of Navrin Island, and westward through the Beag.e Channel, stopping, if necessary, at Banner Cove, in Picton Island, or at the Narrows of Beagle Channel, where, on the south shore, friendly natives are settled, and from which the Mission is distant about 30 miles.
The approximate position of the settlement is in 54 deg. 53 min . S., lon. 68 deg .12 min . W.
africa-west coast.-Gambia river-buoy on african knoll.-Jan., 1871.
Information has been received from the Governor of the West African Settlements that a Black Buoy with Cage has been moored upon the east end of the African Knoll, entrance of Gambia river, in $2 \not / 2$ fathoms at loir water. Position, lat. $13 \mathrm{deg} .34 \mathrm{~min} .40 \mathrm{sec} . \mathrm{N} ., \mathrm{lpn} .16 \mathrm{deg} .36 \mathrm{~min} .50$ sec. W. Also, that no light vessel is now stationed at the river entrance.
sumatra - west coast. -harbor lights at benkoelen.
The Netherlands government has given notice that two harbor lights, of the sixth order, have heen established at Benkoelen, west coast of Sumatra.

1. A fixed white light on Poeloe Tikoes, elerated 39 feet above the level of high water, and in clear weather should be seen from a distance of eight miles. 2. A fixed red light on Point Tapu Padrie, visible between the bearings south to E . by N., elerated 59 fect above high water, and in clear weather should be seen from a distance of three miles.

## africa-west coast-Fixed ligit at accra.-

 ост., 1871.Information has been received from the Administrator of the Gold Coast that a light has been established at Accra. The light is a fixed white light, elevated 50 feet above the sea, and can be seen in clear weather from a distance of 10 milcs. The illuminating apparatus is dioptric or by lenses of the third order. The building, which is $18 / 2$ feet high, is painted red, and stands on the western bastion of Fort James. Latitudo 53148 N ., lon. 91131 W .

Note.-The present building for the exhibition of the light is only temporary. It is in contemplation to erect a tower.

## AUSTRALIA AND SOUTII PACIFIC.

## adstralia-souti coast viotoria-alteration

 in port albert hight.-Jan., 1871.The red fixed and tlashing light wiil bo changed to a white fixed and flashing light, showing a flash every 3 minutes. The steady white light will show for 1 minute 40 seconds, it will then be eclipsed for 12 seconds, and after the flash again eclipsed for 34 seconds. In clear weather it should be seen from a distance of 11 miles.
Within a distance of three miles the light will appear as a continuous fixed light between the fа, heн.
(All hearinns aro magnotic. Variation 8\%/4 dog. eastorly in 1871.)
new zealand-otago harbor.-july, 1871.
The following information is taken from the London Nautical Magazine for July, 1871:-

All bearings are magnetic. Variation 1625 E . in 1871.

The channel across the bar at the entrance to Otago Harbor having gradually regained the deeper water it had before the great tidal wave of A ugust, 1868, cansed it to shoal, the gnide-beacons have been shifted, and two white beacons are now erected on the eand spit extending from the western shore of the harbor. These beacons, brought in line, and bearing S.S.W., will lead over the bar in 18 feet low water sprinys; and when a red and white beacon at the pilot station opens off Howlett Point, a course may be steered for Harrington Point, passing between it and the sand spit.

The channel across the inner bar, $11 /$ mile from IIarrington Point, shifts occasionally ; but on every change the buoys are altered so as to denote the two-fathom edge, the mid-channel depth being 15 feet.
In running up the harbor, red buoys should be left on the starboard hand and black buoys on the port hand.
At the present time vessels drawing 12 feet can reach Dunetin jetty, and improvements of the channel by dredging operations are still in progress.

Caution.-Light southeast winds, generally accompanied by fog, cause minch swell on the bar, which is not the case with northeast wiuds, to whiclr the bar is more exposed.
Tides.-There is no interval of slack water in the entrance of the harbor, where the flood runs five and one-third liours, and the ebb seven hours. The ebb stream begins at forty minutes after ligh water and the flood stream at one hour and forty minutes after low water.
The above notice affects British Admiralty Chart No. 2,411.
west coast of midde island-bligh sound.
The following account of a dangerous pinnacle rock in Bligh Sound, on which H. B.M.S. Clio struck in February, 1871, has been received from Com. F. H. Stirling, R. N.:-
The Chio Rock, with 9 feet, lies in the second reach of Bligh Sound, about half way between Turnround and Evering points. It is the outer rock of a cluster, surrounded by very deep water, $21 / 2$ cables from a bluff point on the eastern shore of the sound. Between it and the point are two rocks of a similar character, with about fivervet over them.
The Clio Rock is steep-to. On its sonthwest side 24 fathoms are found within twenty yards of the rock, and on the north side soundings of from 5 to 9 fathoms were obtained at a distance of 60 yarde.
From the rock, Bare Cone bore W.S. W., Tuinround Point N. by E. 3/4 E., and Evening Point S. 3/4 W. (Lat. 444930 S., lon. 1673210 E.)
Mariners are cautioned that Bligh Sonnd, being similar in its features to the other sonnds and inlets on the western shore of the Middle Islands, in having deep soundings close to steep and precipitons shores. and that althongh the existence of detached outlying rocks is considered to be quite exceptional, still, vessels mavigating these waters must use due precaution, as similar dangers to the Clio Rock may exist where the present surveys would inply there was the usnal deep water.
Bureau of Navigation, Hydrographic Office, Washington, D. C., July 20, 1871.

## soutir australia-st. vincent's gulf-cape

 Jenvis.A fixed white light is exhibited from a lighthonse on Cape Jervis, at the entrance of Backstairs passace from St. Vincent's Gulf.
The light tower is in lat. 353703 S ., lon. 13807 30 E ., and the light will be visible for a distance of

12 to 14 miles on an arc from seaward from N. 25 E. to S. 4 E .

The outer extremity of the reef projecting from Cape Jervis lies 1,600 fect to the southwest of the lighthonse.
[All bearings are magnetic. Variation, 4 deg. easterly in 1871.]

CAPE OF GOOD HOPE-ALTERATIEN IN COLOR OF roman rock leghthouse.-July, 1571.
The Roman Rock Lighthouse, Simons Bay, has been painted in broad horizontal bands of red and white, in crder that it may readily be distinguished when seen against the background of sand.

SOUTH PACIFIC OCEAN-FIJ GROUP-FIXED EEACH lights at leveka.-AUG., 1871.
Information has been received that harbor lights have been established at Levuka, Ovalau Island.

The lights are fixed. The inner light is placed on a hill behind the town, and the outer a little to the south of the Wesleyan Mission House ; in clear weather they can be seen from a distance of five miles.

The beacons from which the lights are exhibited are painted white, each with a red diamond; position, lat. $174045 \mathrm{~S} .$. lon. 17849 E .

The lights by night and the beacons by day, kept in line, lead through the middle of the sonth entrance passace into the harbor.
SOUTH COAST - DUNGENESS PEINT AND LIGHT-HoUSE.-DEC., 1870.
A new beacon has been erected on Dungeness Point, a few yards above high water mark, abont 400 yards S.E. $1 / 2$ E. from the lighthonse tower. The beacon consists of a mast 50 feet high, with two large globes placed vertically thereon.
N. B.-The red sector which is shown from Dungeness Lighthouse into the anchorage in the East Bay is now limited between bearings of N. 61 degrees E. and N. 40 degrees E.. from which tatter bearing the light is obscured to the land.
bristol channel - wreck in milford haven. -DIC., 1870.
A green bnoy, marked with the word "Wreck," has been laid 15 fathoms S.E. of the brig Vectis, sunk near Dale Point, Milford Haven.
The buoy lies in 7 fathoms at low water spring tides, with the following marks and compass bearings, viz.:
The nortll end of Dale Castle, in line with the southernmost house on the beach, N. W. $3 / 4 \mathrm{~W}$.

Dale Point, W. by N., distant $11 / 2$ cables.
West Blockhouse Point, S.W. $3 / 4$ W., distant 1 mile.
The maintopmast of the sunken ressel is still standing, and shows at high water.

## SOCTH COAST-WRECK OFF EXMOUTII.

A green bnoy, marked with the woid "Wreck," has been laid on the S.W. side of the Pole Sand, about 15 fathoms S. W. of the sloop Hope, sunk off Exmonth.
The buny lies in 23 feet at low water spring tides, with the following marks and compass bearings. viz.:
Straight Point, East; Exmonth Church, on the west angle of the Coastguard Station, North.

BRISTOL CHANNEL - WRECK NEAR THE NASH SANDS.-JAN. 28, 1871.
A green bnoy marked with the word "Wreck." has been laid 15 fatho:ns N.E. of the bark S. D. Thurston, sunk near the Nash Sands.
The wreck lies in 10 fathoms at low water spring tides, with the following marks and compass bearings, viz. :-
Nash low lighthouse, its height open north of the high lighthouse, S.E by E. $3 / 4$ E.

Newton Down Mill Cottage. its width open west of Newton Nottage church, N.N.E. $1 / 2$ E.
S.W. Nash Butoy, N. by W., distant 15 -10ths mile.
S.E. Nash Buoy, E. $1 / 4$ S., distant 18 -10ths mile.

The Nash lights in line lead 4 -10ths of a mile N.E. of the wreck.

The lower masts show at about half tide, and the mizzen-topmast shows at high water.

## BRISTOL CHANNEL-WRECK OF THE GOLDEN

 fleece.In order the more effectually to mark the position of the Golden Fleece, two green buoys, marked with the word "Wreck," have been placed; the western being about 20 fathoms from the shoalest spot over the wreck, wit!l the following marks and compass bearings riz.:-Two remarkable trees on the back of the high land, their width east of Sully rectory N. $3 / 4 \mathrm{E}$. The east end of the nexv fort on Lavernock Point, in line with the east side of the peak of Sully Island E.by N. 1/4 N.; Flatholm Lighthouse S.E. by E. $1 / 4$ E. The eastern buoy lies about 30 fathoms E.S.E. of the western.

EAST COAST-SOUTER POINT, TYNEMOUTH AND coquet lights.-Jan., 1871.
The new lights exhibited at Souter Point, and at Coquet, are as follows: At "Souter Point" a powerful revolving electric light showing a bright flash every half ninute, and - $211 / 2$ feet below it, from the eame tower-a fixed light. showing white from a bearing of south 11 deg. east round sonthward, to sonth 4 deg. west, and from thence showing red to south 20 deg . west.
Hariners are to observe, therefore, that when the low fixed white light is open they will be in the line of Mill Rock and Cope C'arr Point, and when it changes to red in tbat of Whitburn Stile, Hendon Rock and White Stones.

As respects the "Tynemonth light," on and after the 11th instant, the white light will be changed to red, and will show a flash of that color every minute; , and

At "Coquet," the Shoal off Hauxley Point will be guarded by a eecond light exhibited from Coquet Island lighthouse, at a distance of 28 feet below the upper one; and at the same time the red shade on the upper light to the southward will be discontinned. The upper light will then show white, by the eastward, to the bearing of $S .3 / 4 \mathrm{~W}$. , and the lower light will show white from the bearing of S.S.E. (being two cables ontside of Hauxley Point buoy, which will in friture be colored red), by the southward to S. $3 / 2$ E., and from thence it will show red to the bearing of $S$. by W. $1 / 2$ W., covering Bondicar Bush Shoal.

Mariners are to observe, therefore, that when the upper light is lost sight of, they have passed the line of Hanxley Point and Bondicar Bash, and that they will then be in the red light only, and must use great caution in approaching the shore.

WRECK BUOY OFF RAMSET BAY, ISLE OF MAN.JAY., 1871.
A bnoy, colored green, with the word "Wreck" in white letters on it, is moored on a wreck which lies off Ramsey, Isle of Man.

The buoy is moored about five miles east from Ramsey harbor, in 12 fathoms water, about 20 fathoms from the wreck, which bears E.S.E. from the buoy. The following bearings are from the buoy:-Manghold Head, S.W. by W.; Ramsey North Pier Lighthonse. W.: Point of Ayre Lighthouse, N.N.W. ; Bahama Lightship, S.S.E.

West coast-wreck in barnstaple bay.-may, 1871.

A green buoy, marked with the word "Wreck," has been placed about 20 fathoms S.W. from the polacea schr. Emma, sunk in Barnstaple Bay.

The buoy lies in 10 fathoms at low water spring tides, with the following marks and compass bearings, viz. :

Clovelly, S.W. $1 / 2$ W
Hartland Point, W. $1 / 3$ N.
Lundy Island, N.W. $3 / 4 \mathrm{~N}$.
Baggy Point, N.E. is E.
Migli Light Tower (Bideford), E. by S. $1 / 2$ S.
The masthead shows about 6 feet out of water at low water spring tides.

## EAST COAST-WRECK NEAR SOUTER PONT.-MAY, 1871.

A green bnoy, marked with the word "Wreck," has been placed close to the stern of the steamship David Burns. sunk between Tynemouth Castle and Sonter Point Lighthouse.

The buoy lies in 9 fathoms at low water spring tides, with the following marks and compass bearings, viz.
Souter Point Lighthouse, S. by W., distant 11/2 mile,

Tynemonth Castle Lighthouse, N.W. by N., dis$\operatorname{tant} 21,4$ miles.
The sunken vessel's head is lying in to the shore, and the topmasts are visible at all times of the tide.
entrance to the river dee.-may 1871.
A new bnoy, painted red, and called East Salisbury, has been placed in $21 / 2$ fathoms at low water spring tides, on the East side of the Salisbury Sand in the channel leading into Dalpool Deep, with the following marks and compass bearings, viz.:

Grange Beacon, in line with Kirby church, E. 34 S. ; Flagstaff at Hilbre Island, midway between the buoy-keeper's dwelling and a small onthonse ; Welshmen's Gut Buoy, N. $1 / 3$ E., distant 12 2-10th's mile : Seldom Seen Buoy, E. $1 / 2$ S., distant 8 -10ths mile.
alteration of time for firing the fog sigNal gun near holyhead.-may, 1671.
The North Stack signal gın, fired near Holyhead in foggy weather, for the greater security of vessels navigating that locality, and particularly for her Majesty's packets, will, as hitherto, be discharged during the continuance of fog once every half hour ; and further, once every quarter of an hour from 5:30 P.m. until the arrival of the mail packet. and also from 10:45 P.m. until the midnight boat is in.

NORTHERN LIGHTHOUSES-POINT OF AYR LIGHThouse, isle of man - increased speed in the revolution of the light.
The speed in the revolution of the revolving red and white lights on Point of Ayr, the northern headland of the Isle of Man, has been altered from a flash every two minutes to a flash every minute.

## west coast-wreck in cardigan bay. -

 JUNE, $18 \% 1$.A green buoy, marked with the word "Wreck," has been placed 1.5 fathoms N . W. of a vessel (name unknown) sunk in Cardigan Bay.

The buoy lies in 14 fathoms at low water spring tides, with the following marks and compass bearingr, viz. :

Kemmaes Head Bay, S.W. by W. 1/2 W. Llangranog Church, S.E. by S. $1 / 2$ S. The mainboom and other spars show at low water.

## enst const-filey biig.-JUly, 1871.

The character of the Filey Brig buoy has been altered, and a bell buoy, painted black, and surmounted by a staff and globe, has been placed at the extremity of the reef in the position recently occupled by the black cen buoy.

## Entrance to the thames-west swin-wrece

 IN S.W. REACH.-JULT, 1871.The green bnoy marking the wreck of the brig Favorite, placed in September, 1870, in the Fairway, near the S . W. buny of the Middle, now lies with the following marks and compass bearings, etc. :
S.W. Middle buoy, E. by N. 1/4 N.. distant 3 cables. The wreck, E. by S., distant 15 fathoms. Swin Middle Lightship, N.E. $1 / 2$ N., distant $51 / 4$ cables. The sunken vessel has only 12 feet over her at low water spring tides, and until the wreck is removed masters of yessels and pilots are hereby cantioned that it is highly dangerous to pass between the S.W. Middle bnoy and the wreck buoy.

## sUmberge head lighthouse, shetland-

 change of light.The catoptric apparatus at Sumburgh Head, the most southern point of Shetland. has beell replised by one on the dioptric system. of the first order.
The light remains fixed white, as formerly. The new apparatus is, however, more powerful than the old.

## WEST COAST-WRECK OFF ABERDOVEY. JULY, $18 \pi 1$.

A green buoy, marked with the word "Wreck," has been laid about 15 fathoms south of the hark Wm. Bromham. sunk on the north side of the bar of the harbor of Aberdovey.
The buoy lies in 4 feet al low water spring tides, with the following marks and compass bearings: The Corbet Arms Hotel, E.N.E. Bar buoy, S.W. distant 150 fathoms.
Portions of the wreck show about 3 feet at low water.
mish Channel-isle of man-alteration in THE POINT OF AYRE LIGHT.
The following alteration has been made in the Point of Ayre light, Isle of Man:-
The red and white light has heen changed from a revolving light every two minutes to a revolving light every minute.

## BLACKWATER AND ARKLOW BANKS.

The following changes have taken place in the Blackwater and Arklow Banks.
[All bearings are magnetic. Variation 2330 westerly in $18 \% 1$.

Holden's Bed, in Wexford South Bay, has shifted more than half a mile to the northeast ward of its position as given on the present charts, and has on its central part as little as six feet.
The Blackwater Bank has grown ont on the eastern side between Nos. 2 and 3 buoys for a distance of $21 / 2$ cables, and on the northwestern side about one cable. The general depth on the bank does not appear to have greatly altered.

The Arklow Bank has grown out on its soatheast side about $21 / 2$ cables, and is also much shoaler to the northward. Arklow Swatch has disappeared, there being now only one-fourth of a fathom where four fathoms were formerly found.

## ENTRANCE OF RIVER THAMES-ALTERATION IN

 position of buots.The following alterations in the position of bloys have been made, viz.:

## PRINCES CHANNEL.

S.E. Shingles Buoy has been moved E. $1 / 2$ S. 1 mile, and now lies in 6 fathoms at low water spring tides, with the following marks and bearings:

Monkton beacon, midway between Lower Hale Grove and Cliff End Farm. S. S. W. $1 / 4 \mathrm{~W}$. St. Peter's Church, just open eastward of Margate Eastern Coastgnard Station, s. 3/4 E. Shinglea beacon, W. by N. 1 4-10 miles. Shingles Spit huoy, W. $1 / 2$ N. 1 6-10 miles. Tongue lightvessel, S. 9-10 mile. Tongue Kinoll buoy, S. E. by E. 1/4 E. 2i-10
miles. Shingles Spit buoy has been moved S. E. 1 cable, and now lies in 6 fathoms at low water springs, with the following marks and bearings:

Chislet Mill, in line with Reculvers Coastguard Station, S. W. 3/4 S. Mount Pleasant House, in line with a large house next west of Birchington church, S. $1 / 2$ W. Shingles beacon, N. E. 3-10 mile. South Shingles buoy, N. W. $3 / 4$ W. $14-10$ miles. N. E. Tongue buoy, S. $3 / 4$ E. $8-10$ mile. Tongue lightvessel S. E. by E. 19-10 miles. S. E. Shingles buoy, E. $1 / 2$ S., 18-10 miles.
[All hearings are magnetic. Variation $19^{\circ} 30^{\prime}$ westerly in 1871.]

GOODWIN SANDS.-OCT., 1871.
The N.W. Goodwin Buoy has been moved 4 cables W.S.W. of its former position, and now lies in 1.3 fathoms at low water spring tides, with the following marks and compass bearings:

East Bottom Semaphore, in width open west of South Foreland high lighthonse, S. W. 1/4 W. St. George's church at Ramsgate, in line with the Obelisk, N N. W. Goodwin Light Vessel, E. by N. $3 / 2$ N., distant $42-10$ miles. Goodwin Knoll Buoy, E. N. E., distant $29-10$ miles. Gull Buoy, N. E. by N. distant 2 6-10 miles. North Bar Buoy, N. by E. $1 / 4$ E., distant $21-10$ miles. Middle Brake Broy, N. W. by W. $3 / 4$ W., distant $17-10$ miles. Gull Light Vessel, W. S. W., distant 1 4-10 miles. N. W. Bunt Btoy, S. W. 3/4 S., distant 2 3-10 miles.

WRECK IN YARMOUTH ROADS
A green bnoy, marked with the word "Wreck," has been placed 15 fathoms eastward of the brigantine Johu Watson, sunk off Yarmouth.
The buoy lies iu 9 fathoms at low water spring tides, with the following marks and compass bearings, viz.: St. Nicholas church tower, its full width southward of the chimney of the silk factory, N. W. by W. $1 / 4$ W. Scroby Elbow Bhoy, N. E. 1/4 E. St. Nicholas Light Vessel, S. $1 / 4$ E.

## east coast of ireland.

A 12 feet Conical Buoy, painted red, with the word "Moulditch," in white letters, to mark the Moulditch Bank, on the East Coast of Ireland. county Wicklow, The buoy lies in 6 fathoms at low water spring tides, with the following marks and compass bearings:

Dalkey Tower, N. $3 / 4$ E. $81 / 4$ miles; Bray Head, N. by W. $1 / 4$ W. $23 / 4$ miles; Great Sugar Loaf, N. W. $3 / 4 \mathrm{~W} .43 / 4$ miles; Wicklow Hill, just open of Six-Mile Point, S.S.W. $3 / 2$ W. 101/2 miles; Wicklow Head Light, S. by W. $3 / 4$ W. $103 / 2$ miles.

 ОСт., 1871.A green bnoy, marked with the word "Wreck." has been placed 30 fathoms eastward of the ship Levant, sunk in 10 fathoms low water spring tides, with the outer Dowsing Light Vessel bearing N. by E. $1 / 4$ E., distant $11 / 2$ mile.
The fore royal jard and mast head show at low water.

## ENGLISH WATERS.

ENGLISH CHANNEL-WRECK OFF BEXHILL.-NOV., 1871.

A green buoy, marked "Wreck," has been placed 20 fathonis south of a schooner sunk off Bexhill.
The buoy lies in $83 / 2$ fathoms at low water spring tides, with the following marks and compass bearings, viz.

Beachy Head. W. 3/4 N. Bexhill Church, N. 3/4 W. Fairlight Church, N.E. 1/4 E.
river thames-alexandra channel.-Dec. 1871.
A spit having grown up about $11 / 2$ cables outside the line of the Southwest Shingles and West Shingles Buoys, in the Alexandra Channel, a can buoy, painted red, has been placed temporarily to mark the edge of the spit.

The buoy lies in $43 / 2$ fathoms at low water spring tides, with the following marks and compass bearings, viz.:
S.W. Shingles Buoy, E. $3 / 4$ S. West Shingles Buoy, N.W. Girdler Beacon, S.W. 1/2 S.

YARMOUTH ROADS-ST. NICHOLAS LIGHT VESSEL.
In accordance with the notice issued on the 27 th of September last, a red light, dashing every ten seconds, is now exlibited from the miz\%enmast of the St. Nicholas light vessel, instead of the red fixed light hitherto shown therefrom.

## ENGLISH CHANNEL-FOG SIGNAL-SEVEN STONES LIGHT VESSEL.

A powerful fog horn will now be somnded in foggy weather from the "Seven Stones" light vessel.

The blasts will be emitted at intervals of ten seconds, and distributed over all points of the compass.

## CHINA AND JAPAN.

CHINA-YANG-TSE-KIANG-FIXED LIGHT AT SHAWEISHAN ISLAND.-APRIL, 1871.
A ligbt is shown from Shaweishan Island, at the entrance of the Yang-tse-Kiang.

JAPAN-YEDO GULF ENTRANCE-FLASHING LIGHT ON CAPE SAGAMI.-APRIL, 1871.
From the 1st March, 1871, a light will be exhibited from a lighthouse recently erected on Cape Sagami, west side of the entrance of the Gulf of Yedo.

The light is a flashing white light, showing a flash every ten seconds, visible seaward from E. by N. to S . W. $1 / 4 \mathrm{~W} . ;$ a red sector of ten deg. is added to cover the Plymouth rocks, extending from the last bearings to S.S.W. 3/4 W. It is elevated 110 feet above the sea, and in clear weather should be seen from a distance of 16 miles.

The illuminating apparatus is dioptric, or by lenses of the second order.

The tower, 36 feet high, is situated on Tsurngasaki, in lat. 35 deg. 3 min . N., lon. 139 deg. $41 \mathrm{~min} . \mathrm{E}_{\mathrm{c}}$
[All bearings are magnetic. Variation, $31 / 2 \mathrm{deg}$. westerly in 1871.]

CHINA - EAST COAST - NORTH SADDLE ISLAND LIGHT.
A first-class revolving light (every minnte) is exhibited on North Saddle Island. The light is obscured to the southward, from False Saddle Island to Elliott Islands, or between the bearings N.W. 2/3 W. and E. by N. $1 / 2$ N., and that it is 273 feet above high water. In clear weather it should be scen from a distance of 23 miles. The illuminating apparatus is dioptric or by lenses of the first order.

The lower part of the tower is painted white and the upper part black.

SHOALS OFF TURTLE RUCK.
The following letter from Rear-Adiniral John Rodgers, Commander-in-Chief of United States Asiatic Fleet, is published for general information:

United States Steamer Colorado,
Wposung, China, April 21, 1871.
Lieutenant Rockwell, commanding the United States steamer Palos, reports that on his recent passage from Hong Kong to this port he found, in lat. 22 46 , lon., 11603 E. , a number of soft lumps off Turtle Rock, near Cupchi Point, with two fathoms of water on them.
The bearings (magnetic) from the outer lump found were as follows: Cupchi Point, N. $3 / 4$ E., 3.15 miles ; the hill marked on the chart $\% 26$ feet. N.W. $3 / 4$ W. 7.15 miles.

As these lumps are in a position where, by thecharts, vessels may safely go, warning is hereby given that those drawing more than twelve feet of water shonld give a berth of at least four miles to Turtle Rock.

DOIIINION OF CANADA-COASTS AND INLAND WATERS.
Lagota Bluff, Gulf of St. Lawrence, August, 1871.
A lighishuso has been crected by the gorernmeat of Canaila on Bagota Bluff, three-fourths of a mile west from tho south point of tho island of Anticosti, Gulf of St. Lawrenco. Lat 4004 N , lon 6215 W .

A powerful fash white light is exlibited, showing a fiash at an iaterval of $火 v$ seconds.

Tho light is clevated 75 feet abovo the level of the sea, is risiblo from all points of approach, and, in clear trather, ean be scen at a distance of 14 miles.

The tower is a wooden building, hexagonal in shape, and 54 feet high from base to vanc. The keeper's drelling, also of wood, stands about 150 feet cast from the tower. All the buildings are painted whic.
The illminating apparatus is catoptric, and consists cf twelre lamps and reflectors. The light was first s'awn on the 15th of August, 1871.
$\Lambda_{\text {powerful steain fog whistle has also been placed }}$ at a distance of about 300 feet cast from the light. house cas south point $\Delta$ nticosti, and in thick and fogry r.eather, and ia snow storms, will be sounded for 10 sceonds ia crery minute, thus making an interval ef 50 seconds between cach blast.

Tho whistle wiil probably be heard at tho distancos f. llowing:- ${ }^{1}$. In calm weather, 15 miles. 2. With the wind, 20 miles. 3. Stormy weather and against the wind, 5 to 8 miles.
capl chatte.
A lighthouse has been crected on the northwest point of Cape Chatte, in the Gulf of St. Lawrence. Lat $40 \mathrm{C5} 5 \mathrm{JN}$, lon 664550 W .

A white Iash light is shown, with an interval of 30 sceonds between each flasis. It is clevated aboat 110 feet abore high water, and can be seen in clear weather about 18 miles. It is visible from all points sea ward except the east, in which direction it is obscured by Chatie Point and Cape Anno. The lighthouso is a low, square tower, with drelling house combined, painted white, and stands at a: cleration of 37 feet from baso to vane.
Tho iillaminating apparatus is catoptrio, there being six powerful lamps and reflectors placod on a revolving frame.
The light was exhibited for the first time on tho 11th of August, 1871.

## cape magdalen.

A lighthouse has been erected on Cape Magdalen, in the Gulf of St. Lawrence. Lat 491540 N , lon 651330 W .

1 revelring red and white light is exhibited, showing red and white every 4 minutes, there be. ing an interval of 2 minutes between each flash. Tho light is clerated 147 feet above high water, is visible from nill points of approach seaward, and can be seen, in clear weathcr, the red light 15 miles and the white 20 miles.

The tower is a hexagonal wooden building, painted white, and is 54 feet high boun base io vane.
Tho illuminating apparains is catoptrio, there being four potrerful lamps and retlectors.

It was exhibited for the first time on the 21st of Aagust, 1871.

## canso hiarbor-Nova scotia.

In order to facilitato tho navigation into Canso Harbor by tho northern entrance, boacons will be crected, tho positions of which aro herewith given, together with tho necessary sailing directions.

BEA OXi-Two heacons, 30 feet ligh with triangular heads painted white, aro beciug ereeted on the Boathern shore of Canso Harbor Thu southern boacon will be on Lanigan's Hill, with the Roman

Catholic Charch bearing NTV by TV westeriy. The northern beacon will be on tho eastern sido of Grave Islet, at high waicr mark, and will bear N $1 / \mathrm{E}$ from the bason ou Lazizan's Hill.
Drimetrons-To citer Coiso Marbor by tho northwest entrance, being outside the Net lioeks, bring the Roman Catholie charela stcerle at Canso to bear Shalf W, when it will bo seen over Cutler Island, midway between the house on the island aad its western end. Stecr S half W for this mark and it wiil leal nearly millway betrecan the Bald and Whitman roc'zs, and when the red clay cliff cf Glasgow Head, to iko southward of Canso, is scen through the ehannel be' weea Cutler and Piscatiqui islands, bearing S by E three-quarters E, stecr for it, lecping in mid-channel until Grare Islet Eeacon comes on with Lanigan's Beacon, bearing S half W, then run with these beacons in line, and when Cranbecry Lighthouse appears in one with Fort Point on Grassy Island, trail to the westward into the harbor.

> GUT OF CANSO-cerderus nock.

Information has also beca received that tho red buoy marking the Cerberus Roek, at the southern entraneo to the Gut of Canso, is moorcd in 15 fathoms, about half a cable SSW of tho rock.
Variation 17 deg westerly in 1871.
nOVA sCotha-mahone bat-mast mbondound island.-march, 1871.
A light is now cxhibited from the reecntly rebailt lighthouse on East Ironbound Island, Mahone Lay.
The light is a fixed ryite light, elerated 150 feet abore ligh water, and ia clear weather should be scen from a distance of sisteen miles.
The illuminating apparatus is eatoptrie, bat from the 1st April, 18 itl, will be dioptrie, or by lenses.
The tower is forty-six fect high, and surmounts the keeper's dwelling.
day of fundy-st. maris'b pay-sissidou niver. -maicii, 1871.
$\triangle$ light is now cahibited from a lighthouse recently erected at the entranec of Sissibou river, St. Mary's Bar.
The light is a fixed white light, elevated 33 feet abore ligh water, and in elear weathcr should be seen from a distance of 8 miles.
Tho illuminating apparatus is catoptric or by refleetors.
Tho tower, 33 feet high, is square, built of wood, and painted white. losition, lat 44 deg 25 min $30 \mathrm{sec} \mathrm{N}, 1 \mathrm{lon} 66 \mathrm{deg}, 1 \mathrm{~min}, 15 \mathrm{sec} \mathrm{W}$.

## gulf of st. lawrexce-chalect bay.-mazch,

 1871.A lighthouse has recentily been erectel on Bonami Point, south side of the entranee of Dulhousic harbor, from which a light will be exhibited during the scasou of navigation.
Tho light is a fixed white light, elevated 49 feet aboro high water, and in clear weather should be Been from a distance of 13 miles.
Tho illuminating apparatus is catoptrio or by reficetors.
The torrer, 33 fect high, is square, built of wood, and is painted white.
Position, lat 48 deg $3 \min 45 \mathrm{seo} \mathrm{N}$, lon 66 deg 20 min 50 sec W .
pugwash marbor-nova scotia.-Auguet, 1871.
A lighthouse has been erected by the government of Carinda on Seaman's or Fishing Point, on the east sido of the entranco to tho harbor of Pugwash, Nora Scotia, lat 455230 N , lon 634030 W . A tixed light is cxlibited, showing red seamard and white toward the harbor. It is clerated 48 fect above high water, and in cloar woather can bo seen at a dis ance of 8 miles, and is visible from all points of approach.

Tho torser is a square wooden building, 44 fcet high, and is painted white. The illaminating apparatiss is catoptric, there being four lamps ane reHecturs.
alston's ponit-bathurst harbor.
Two beacon-lights have been erected on Alston's Point, at tho entrance to Hathurst Harbor, New Brunswick, lat 47 3.) N, lon 6538 W . These beacons aro situated 355 fect apart, the outer beacon cxhibiting a white fixed light and the inner a red fixel light. The outer beacon stands at an elevation of 27 fect abore high water, and the inner at an elevation of 31 1-2 feet.

The buildings are of wood, hexagonal in shape, and painted white.

The lights are for the parpose of guiding ressels into the harbor by keeping them in range, and can be seez at a distance of 10 miles.

Cape ray-newfoundlaid.
A lighthouse has been erected on the western side of Cape Ray, on the southwest coast of the island cf Newfuundland, lat 4737 N , lon 5 j 18 W. A powerfal flash white light is exhibited, making a complete revolution in two and one-fourth minutes and fizshing every ten seconds; at a long distance, howercr, it has the appearance of a steady light. The light can probably be seen at a distance of $\approx 0$ miles in clear weather.

Tho tower is a wooden builling, hexagoual in shapa, 41 feet high, and painted whitc. The keeper's dwrelling, also of wood, stands at a little distance from the tower and is also painted white.

The illuminating apparatus is catoptric, and consists of 12 lamps and reflectors.

AMMERST ISLAND-GULF OF ST LAWRENCE.-JULY, 1871.

A lighthouse has been erected at the South Cape of Aunherst Island (Mardalen Islands), Gulf of St. Lawreace, lat 4713 N , lon 6158 W . A revolving light is exhibited, showing red for 33 seconds and white for 30 seconds in each minute. It can probably bo seen in clear weather a cistance of $2 j$ miles.
The tower is a hexagonal mooden bailding and paintal white. The keeper's dwelling is also paintel white.
The illuminating apparatus is catoptrie, and consists of four lamps and reflectors.

RED ISLAND REEF-RIVER ST. LATHRENCE.-AUGUST, 1871.

An iron ligitship has been stationed by the government of the Dominion of Cairaia on Red Island lieef, Hiver St. Lawrence. The vessel is moorel ia ten fathoms depth of water, and lics in a northeasterly direction from Red 1sland, a little opea to the north of Hare Island, with the red baoy lyipl abou: half a mile in a west-southwesterly direction.

A fixed white catoptric light is exhibited from the furenast of the said vessel during the season of navigation, at an eleration of 34 feet from the deek, and will probably be seen at a distaace of 12 miles. The ressel is painted red, with the words Red Island Lightship on each of her sides in large white letters.

A steam fog-whistle has been placed on the above named lightship, and during thick and foggy weather and snow-storms will be sounded for iv seconds in cvery minute, thus making an interval of 53 seconds between each blast.

The whistle will pzobably be heard at the distances following-18t, in calm weather, 15 miles; 2 d , with the wind, 20 miles; 3 d , stormy weather, from 5 to 8 miles; 4th, against the wind, from 3 to 5 miles.

NEWFOUNDLAVD-EAST COAST-FIRET-LAND HEAD. AUGU゙ST, 1870.
From the 1st day of October, i871, a light will be
exhibited from a lighthouse recently erected on Ferryland Head, east coast of Newfoundland.

The light will be a fixed white light elcrated 200 fect abore the level of the sea, and in clear weather should be seen from a distance of 16 miles

The light tower is built of red bricks PositionLat 47 N , lon 5251 W . The keeper's dwelling is painted white, with a red roof.
nova scotla-light at mank-a-diev.-aUgust, 1871.

A lighthouse has been erected at Main-a-Dieu, on the westerly end of Scattari Island, Cape Bre ton, Nova Soctia. Lat 460030 N , lon 544730 W
A fixed red light is exhibited at an elevation of 90 feet abore high water, and can be seen at a distance of 9 miles.

The tower is a square wooden building, 40 feet high, and painted white. The illuminating apparatus is catoptric, and consists of four lamps and reflectors.

INGONISH ISLAND-NEW LIGHT.
A lighthousc has been erected on Ingonish Island, Cape Breton, Nova Scotia: Lat 464120 N, lon 6020 cu W.

A fixed white light is exbibited at an elevation of 237 feet above high water, and in clear weather can be seen at a distance of 15 miles.

The tower is a square wooden builaing, 40 feet high, and painted white The illuminating appsratus is dioptric, with lenses of the fifth order.

> 6T. ANS's, CAPE BRETON,

A lighthouse has been erected on the north side of Poiut of Beach, at the entrance to the harbor of St Ann's, Cape Breton, Nova Scotia. Lat 46 173 J N , lon 60 3 15 W.
A fixed white light is exhibited at an elcration of 24 fect abore ligh water, and can be scen at a distanes of 3 miles.
The lighthousc is about 30 feet high, and painted White The illuminating apparatus is catoptric, and consists of two lamps and reflectors, one facing southrest and the other northeast. The light is exhibited to find the entrance through the Narrows to the harbor, which cannot be distinguished in dariz nights.
halifax harbor-Sambro island-daboll fog-
TRUMPET.-OCTOBER, 1871.

Guns will be fired during thick and foggy weather from the signal station on Sambro lsland, as follows: Signal gans froim ships will be answered by the discharge of so 2 r-ponnders in quick succession, and the sa:n reply will be made from the island to the sound of a steamer's whistle.
gULF OF st. LaWrence-NOV. 1871.
A lighthouse has recently been erected on Egg Island, off the north shore of the Gulf of St. Lawfrence, in the province of Quebec. Lat 4938 N , lon 6710 W.
The light is a revolving white light, showing a flash every minute and a half. It is clevated 70 feet above the level of the sea, is visible from all points of approach scaward, and in clear weather should be seen a distance of 15 miles.

The tower is an octagonal building, 35 feet in height, surmounting the keeper's dwelling, and stands 600 feet from the south end of the island.
The illuminating apparatus is caroptric, and consists of four powerful lamps and reflectors.
The light was exhibited for the first time on the 24 th of October, 1871.

## straits of belle isle.

A lighthouse has recently been erected on Cape Norman, the most northerly point of Newfound.
land in the Straits of Belle Isle. Lat 5138 N, len 555340 W .
The light is a revolving white light, showing a flash every two minutes. It is elevated $1 \ddot{8} 8$ foct abore the level of the sea, and in clear weather will be seen a distance of ncarly 20 miles. It is visiblo from all points of approach seaward:

The tower is a hexagonal building, 40 feet high, painted white, and stands 100 feet from the keeper's dwelling: All the buildings are painted white.

The illuminating apparatus is catoptric, and consists of six powerful lamps and reflectors.

The light was exhibited for the first time on the Ist of Octeber, 1871 .

GULE OF ST. LAWRENCE-NEWFOUNDLAND:
A lighthouse has recently been erected at Point Rich, Newfoundland, in the Gulf of St. Lawrence. Lat 504150 N , lon 572528 W :

The light is a flash white light, showing a flash every 15 seconds. It is elevated 130 fect above the level of the sca, and in clear weather cain be seen from a distance of about 18 miles. It is visible frem all peints of appreach scaward.

The tower is hexagonal, 40 feet high, painted White, and stands 100 fect frem tho keeper's dwelling, which is also painted white.

It is illuminated by catoptric apparatus, and has 12 powerfullamps and reflectors.

The light was exhibited for the first time on the 26 th of $A$ ugust last.
SANDY BLACH POINT, GASPE IIARBOR -OCT. '71.
$\Lambda$ light vessel has been stationed off Sandy Beach Point, Gaspo Harber, Province of Quebec.

Lat 485015 N , lon 642430 W .
A rellight is exhibited from the mast of the vessel at an clevation of 29 feet from the deck.

The vessel is painted red, with the word "lightship" on cach of her sides in white letters.

This light is for the purpose of guiding vessels inte the harbor.

The above affects charts Nos. 9 and 15, Hydrographic Offico, U S N, and Nos. 1163, 1134, 1747, 23 aa, 302, 1715, 2036, British Admiralty.
GULF OF ST. LAWRENCE, SEVEN ISLANDS-FIXED LIGHT ON CAROUSAL ISLAND.-OCT. '71.
A light is now exhibited from a iighthouse recently erected on Carousal Island, one of the Soven Islands on the north shere of the Gulf of St. Lawrence.

The light is a fixed white light, clevated 195 feet above the level of the sea, and ia clear weather should be seen from aylistance of $2=$ miles.

The illuminating apparatus is catoptric, or by refectors.

The tower is square, 25 feet high, painted white, and is over the keeper's dwelling.

Position-Lat $5{ }^{\prime}$ deg $5 \mathrm{~min} 40^{\circ} \mathrm{sec} \mathrm{N}$, lon 66 dog 22 min 40 see W .

RIVER ST. LAWRENCE-FIXED LIGITT ON CAPE ROUGII.
A light is now exhibited from a lighthouse rocently crected on Cape Roagh, in river St. Lawreace.

The light is a fixed white light, elevated 175 foet above the high water level, and in clear weather shoald be csen from a distanco of 10 miles.

The illuminating apparatus is catoptric, or by renectors.

The tower, 24 fect high, is a squaro woodon build. ing, painted white.

Pesition-Lat 47 deg $7 \min 20 \mathrm{seo} \mathrm{N}$, lon 70 dog $42 \min 45 \mathrm{sec} \mathrm{W}$.

## MEDITERRANEAN SEA AND SUEZ CANAL.

mediterranean-alexandria-mmecons in hogriaz or central rass.-3iay 1871.
The under-mentioned beacons have been placed In the Bog'az or Central Pass, Alexandria.

A fleating beacon, painted black and white in horizontal stripes, showing about 20 fect abore the water, with a bell on the top, has been placed on the 3 'fathoms pateh in the Boghaz Pass.

The beacen is in 4 fathoms, and bears from ElKot Beacon NW $3 / 4$ W.

Also that a beacon, painted black, has been placed on the outer shoal or 3 fathom rock.

The beacon lies $1 \frac{1}{3}$ cable to the SW of the abevenamed beacon. Ships approaching to the Central Pass will keep between the beacons, and then steer by the marks given on the Admiralty Chart of 1869.
[All bearings are magnetic. Variation 5 der 48 $\min W$ in 1871.]
MEDITERRANEAN-ALGERLA-ALTERATION IN LIGITS AT BOVA.
The port of Bona is now lighted by three harbor lights, riz. :
North Jetty-A fixed red light on the head of the North Jetty.
South Jetty- $\Lambda$ fixed green light on the head of the Seuth Jetty.
And two orange yellow lights at the entrance of the basin.
Note-When from the force of the sea the light on the North Jetty cannot bo lighted care must be taken in appreaching tho pert.
mediterrantan-Adriatic-Fixed and flashing
Light ois poivt say cataldo.-June, 1371.
From the 1st day of March, 1871, $\Omega$ light will be exhibited from a lighthouse recently erecied on Point San Cataldo, ncar Bart.

The light will be a fixed ant flashing white lirht, clevated 213 fect abore tho sea, and in clear weather should bo seen a distance of 21 miles.

The illuminating apparatus is dioptric, or by lenses of the first order.

The tower, 174 feet high, is octagonal in form, painted white, and is attached to the keeper's dwelling, which is painted dark Jellow. Pocition as given:-Lat $42 \mathrm{deg} \mathrm{N}, \operatorname{loz} 16 \mathrm{deg} 51!\mathrm{min} \mathrm{W}$ from Greenwich.

Sicily-Palermo-red ligit on mole.
The mole at Palcrmo having been compleced, the small red light has been placed on the mole thirtyfive yards from the extremity.
PORT SAID-SULZ CANAL.-AUG., '71.

The following sirnals haro been established at Port Said:-

A ressel in the road exhibiting lizhts at tho foremast head, fllowed cither by ruciacts, blue lirghts or a gun, is tho sigral that she requires a pilot to enter the port.

The above will bo thus answered from the harbor offico:-If by $n$ rocket, pilot is going to you; if by a blue light, pilot carnot go off to you.
N. B.-Ships in the barbor call the pilot by means of threc lizhits on the tep of the foac:ast; bat they must have intimated beferehand their iatention to sail.

1. Pilotage at nighttime is established at Port Said from the lst of Junc 1871.
2. Pilotago is compulsory for vessels measuring more than 100 tena register.
3. Dues for nirght pilotago (after sunset and before sunrise), in and out, are 23 franes for sailing vessols and 50 franes for stoamers, when they de not pass througis the canal.
4. When the ships are to go through the canal the duez aro reduced to 10 franes for sailing vesscls and $2 j$ franes for steamers.
5. Consignces are liable for pilotage dues.
6. Ships eatcring the harbor vithout a pilot will bo liable to pay these dues.
the suez canal.
Tho Suez Canal Company, Laving recently conseated to almit ehips into the harbor of I'ort Said batween sunset mad sanise, have pablishod the conditions upon which such eatranco may b3 effectel. Tho following is a copy of the said con-ditions:-
Conventional signals between ships in the roads and the IIarbor Ofice to obtain entranco at nighttime.

## RED GEA-DEPTH OF WATER ON JUBAL STEAIT

 BANK.-AUG., '71.Information has been reccired from II. D. M. steamer Nemport, engaged in surveying northern part of Red Sea, that shoal ground of eighteen and trrenty cour feet has been found on the bank in Jubal Surait (Jubal Strait Bank), lying milway batwcen Tur and Shukhair, hitherto considored to hare not less than fire or six fathoms watcr on it, wits an assumed shoal of tiventy-ono feet.

The shoal coral pateh of eirhteen feet sounded bJ ido Newport is in lat 231015 N, lon 33234 JL , and two miles to northward of this is another shoal of tweaty-four fect. In the neighborhood of thess shoals soveral patches with from soven to ten fathoms were found. Tho neighboring eoast of Nas Shukhair may bo approaehed to within oas mile, as there are no outlying dangers.

Quaravtine on the suez canal.-Sapt., '71.
Messr3. S. L. Morchant \& Co., Transit Agcats for the Suez Unirersal Ship Canal Company, 70 Soath street, Now York:-
Dear Sins-Pursuant to instructions we hare just receivel from Messrs. C. \& A. Bazin, of Pu=t Sail, we bog again to call your atteation to tho neeessity-apw moro ureatly than ever existing -that the bills of health of siea: or sailing shins bound for Erjpt, or ria tha Suez Canal, shoull b3 in strict comformity with tho grneral rezalations adoptel by tha Sanitary Boayl of Esypt, espocially under the circumstanees wilie'l havo callol furit th3 circular of which wo rocently forwardel you a copy.
Messis. Bazin fear that commanders of ships may not bo sumeicatly alive to tho imparáiro nccossity of lou'ing most closely to this bain done, the question being a most sorious ono, involring a quarantine of from 10 to 15 days. While they have hitherto by their exertions avoided any sori. ous cansequences, they wish us to point out to their frienls that they cannot undertaje, if this ajertion is not given to the sabject, that they will bs equally successfal in fature.

CORY BROS. \& CO.
An extract from a textual copy of a circular aldressed to the various Earopean consuls resilant in Ersnt, under date of the 5th September, 1071, by Colacel Bey, President of the Sanitary Board of Egypt, is annexel:

Steamship owners are cspecially warncd that the

Egyptian sanitary authoritics will henceforth bo stricter than ever in caforcing the quarantino regulations, wherever the ships may come from. No ship should sail without carrying bills of health in perfect order; such documents should stato very correctly the number of peoplo composing tho crow and passengers on board, and the written declaration which the commander is required to hand to the sanitary authorities bofore his ship can obtain free pratique should bo made to correspond with the bill of health. The great majority of quarantine delays arise from non-observance of this precaution.

Further and special instructions may be had on npplication to us or to our London representatives, Messra. Cory Bros. \& Co., 150 Leadenhall street, E. C., or Messrs. S. L. Merchant \& Co., New Yora.
C. \& A. BAZIN, Port Said and Suez,

Steamship Agents, coal furnishers, bankers and wharfingers, Lloyd's Agency.

Po:it S.idd, Sept. 10, 1571.
Since tho beginning of this month the Sanitary Board of Egypt, yielding to the numerous reprocontations made toit, has at last consented to allow ships while on transit through the Suez Canal to communicate freely with either Ismailia or the terminal port of the canal without undergcing any sanitary formalities, save getting their bills of health rised at the terminal port or taking out a new one, aecording to regulations. We hope this concession may prove the forerunner of other improvements in the sanitary regulations of this country.
say vincente de la banqura-Fixad red ligit on foint de la sille.- - october, 1871.
A light is now cxhibited from a lighthouse recently crected on Point do la Silla, entrance of the harbor of San Vincente do la Barquera.

The light is a fixer rel light, elevated 142 feet abore the sea, and ia clear weather should be soen a distance of 9 miles.

The illuminating apparatus is dioptric, or by lonses of the sixth order.
The tower, 140 feet high, is built of stone, and is attached to the keeper's dwelling.

Position, lat 43 deg 23 min 33 soe $N$, lon 4 deg $2 J$ min 53 sec west from Greenwich.
(All bearings aro magnetic. Variation 10 deg westerly in 1871.)

PHLIPPINE ISLANDS-LUZON-MANTLLA BAY-ALTEnation in manilla light.
A now apparatus has beer fittel to the lightlowase at the ontrance of tho Rio Pasig, Mnnillla.

Tho light is now a fizol red light, and in clear weather should bo seen from a distance of 9 miles.

Tho illuminating apparatus is dioptric, or by leases of the sixth orde:.
meditermeneani-sicilit-ilardor light at traPANI.
The Italian government notifies that from the 1Gth Norember, 1s71, an ordinary red light, which in cloar weather shothld bo seen or distance of 4 miles, would be exhibited from tho extrenity of the Mole of Trapani, on th3 quarantine builling.

The light bears E bJ $N$ (northerly) from the Columbaja Islet Light.

France-south coast-alteratioy Li light at POET FAIOUL.

From the 15th of November, 1571, the rhito liz't now exhibited from a soafiolling at the extremity of the Mole at Port Frioal, Mo Batonean, Marseilles, will be replaced by a fixed red light from a lighthouse recently crected.

The light is elevated 35 feet above the sea, and in clear weather slould be seen from a distanco of 5 miles.

Mediterranean - SIcILY - FIXED AND FLASHING LIGHT ON THE ISLAND OF CAPE PA88ARO.-NOVEMBE!2, 1871.
The Italian government has givon notice that from the 15th day of November, 1871, a now light will bs cxhibited from alighthouse recently erected on the island of Caps Passaro.

The light is a fixed and flashing white light, showing a flash every 3 minutes, clevatcd 129 feet above the sea, and should be seon in clear weather from a distance of 1,2 miles.

Tho illuminating apparatus is dioptric, or by lonses of the fifth order.
The tower is 17 feet high, and stands on the NE angle of the furt on the island. Position, lat 35 deg $41 \mathrm{~min} 3{ }^{\circ} \mathrm{sec} \mathrm{N}$, lon $15 \mathrm{deg} 9 \min 49 \mathrm{sec}$ east.

## NORTH SEA COASTS.

GERMAN COAST - EASTERN COAST OF PRUSSIADEPTII OF THE SOUND AT MEMEL -MARCH 20, 1871.

According to the charts of November 2, 1870, the least depth of the Sound was at that timo 22 feet (Rhenish) between the two outermost black buoys (II and $V$ ) in the line of the range buoys. Southward from this linc, toward the line of the black buoys, 21 feet of water is found, and to the northward 25 feet. In general the depth is greater near and along the line of white buoys than in the middle of the chamel. Not less than 24 feet is found there.

In the liue of the buoys which give a range for the entrance to the channel, near the ton buoy, which marks the entranee, 40 feet is found; from there until opposite the first blaek buoy ( $V$ ) not less than 24 feet is found, and between this and the next (IV), 22 to 24 feet. Farther in, until opposito the southern head of the molc, 22 1-2 to 26 feet, and in the middle between the two moles, 24 feet.

DEPTII OF THE SOUND AT PILLAU.
The least depth of the cirannel of the Sound in front of and between the moles is now found, aceording to the charts of October, 1870 , to be $181-4$ feet (Khenish), a short distance outside of the entrance in the liuc of the range buoys at the extremity of a small bar. That bar extends from the northern head of the mole nearly at right angles into the channel, but has much diminished in extent since 1869. The depth increases rapidly seaward, and toward the harbor gradually to 30 feet.

MECKLENBURG COAST-LIGHT OF WARNEMUNDE.
The lens apparatus of the Warnemunde lighthouso is being repaired, and will, from the 25th of January of this year (1871), ve replaced by a lantern light. The light will be visible in clear weather about 8 nautical miles, and in cloudy weather about 7 .
POMERANIAN COAST-SOUNDINGS OFF THE ENTRANCE
TO, AND IN THE IIARBOI OF, STOLPMUNDE.
(Accorcing to the charts of soundings of October, 1870.)

The harbor, which is a basin about 330 yards long and 125 yards wide, is furmed of two moles. In the middle of the entrance ( 110 feet wide) the least deptl of water is 12 Rhenish feet; close to the head of the western mole, 14 feet. In a line through the midalc of the basin the depth is $101-2$ to 8 feet; sideways from the same the depth decreases to 4 feet.

Just in front of the entranec to the harbor, about 200 yards distant from the heads of the moles, the depth is 15 feet; just iu front of them, 13 or 14 feet.

In these soundings an ailowance of 2 feet 3 inehes abere low-water inark is takon.
soUnlhings off and herween the moles at huGENWAYDEEMUNDB.
(Aceording to the elarts of soundings of October, 1870.)

Off the entrance, about 540 feet distant, the least
depth of water is found to be 121-2 Rhenish feet; abuut half way between this and the heads of the moles, 16 to 20 feet, and direetly off the entranco, in the middle channel, $61-2$ foet; moro tow ard the eastern mole head, 91-2 feet. In the middle of the entrauce tho depth is 12 feet, and farther in be tween the moles, $103-4$ to 10 feet. In theso soundings an allowance of 3 feet above low-water mark is taken.

DEPTII OF WATER IN THE SOUND AND BETVEEN THE MOLES OF THE HARBOR OF COLBERGERMUNDE. (Aceording to the charts of soundings of October, 1870.)

The entrance to the harbor is formed by two moles stretching out in a north-westerly dircotion. The eastern one of these is the longer. Opposite the eastern molehcad, in the middle of tho channel, the depth is 17 to 20 Rhenish feet; opposite the western molehead about 12 , and farther toward the eastern mole, 14 or 15 feet. Farther in the depth gradually increases; in the channel, near the commencement of the moles, there is about 17 feet of water.

Off the entrance, at a distance of about 250 yards northwest from the eastern molehead, not less than $151-2$ fect of water is found, and at a like distance west of the same, not less than 12 feet.

In these soundings, an allowanco of 4 feot 7 inches above low-water mark is taken.

## NORTH SEA-COAST OF PRUSSIA.-MAY, 1871. Entrance to the Jahde.

This light-vessel will be at her station after the 30th day of A pril, 1871. It lies outside of the white buoy line, between buoys 4 and 5 , in front of the NW spit of the Minser Sand, in six fathoms of water.

Two fixed lights will be shown, one from the mainmast, at an clevation of 50 feet, the other from the foremast, at an elevation of 34 fect above the water, visible all arouud the horizon to the distance of 9 miles.

The lightship has three pole masts, and carries at her foro and mizzen tops a black ball of network; at her stern, by day, the North German onsign and the pilot signal thag. She is painted red, with the name Auszerjahde, in large letters, on both sides.

Position, lat 534843 N , lon 80124 E.
Caution-Vessels must pass westward of the lightship.

During foggy or hazy weather the ship's bell will be rung for one minute continnously, at intervals of three minutes. Provided the ship be not at her right station, the distinguishing marks will be hauled down and the lights extinguished.

The above notice affeets U S Light list No 4, and British Admiralty Chart No 1875.
[The information contained in this notico must be carefully eonsidered, be noted in the sailing directions, and compared with the chart when the ship is navigating the parts to which it refers.

NORTII SEA-NETHERLANDG-TEXEL ENTRANCE-AL TERATION IN FALGA LIGHT.-MARCH, 1871.
The following aiteration has been made in Falga Light, near south side of the ontrance of Texel.

The Light is now green between the bearings $N$ by E and E by $S$, and rod, as before, on the other points of the compass.

Note-In ontering the Seulpe Gat, tho Light at Kykduin and the leading light on Dirkoomsduin should be kept ín line as long as the Falga Light appears green; but as soon as it changes to red bring the Kykduin Light gradually open of the other.
[All bearings are magnetic. Variation 18 deg westerly iu 1871.]

## GULF OF BOTINIA.-FIXED LIGIIT AT PORT

 SKUTKARS.Also, that between the 15th April and the 1st December in each year, a fixed red light, which should be seen from a distance of 4 miles, is exhibited from a small wooden tower on the northwest extremity of Malm Island, at the entrance of Skutkars harbor, Geflc Bay. Position, as given, lat 60 deg 39 min 18 sec N , lon 17 deg 24 min 36 sec E .

## netherlands-Tenel-Ligits for tite schulpe

 GAT.The Netherlands government has giren notice that tiro lights will shortly be exhibited in the immediate neighborhood of the two beaeons erected on the Zanddjik, near the entrance of the Schulpe Gat. The outer buoy of the Gat will be in line of the two lights.

## PORTUGUESE WATERS.

portuguese weather sigials. New York, Oct. 9, 1871.

## To thie Editor of the IErald:-

SIr-I transmit to jou the enclosed notice regarding the signals adopted in Portugal to indicate the meteorological rariations, and ber of you the favor to publish the same notice in your important journal, in order to make it known to the commerce and narigation of the United States.

I remain, sir, with regard, your obedient servant,

GUSTAV AMSINCK, Vice Consul.
By order of the Dircetor of Telegrams and Lighthouses of the Kingdom (of Portugal) this advertiseinent is published, that from this day the meteorological variations will be announced by hoisting on the yards of the masts at the semaphoric stations in the Nary Yards at Marinha, Vianna do Castello, Nossa Senhora da Luz, Cabo Carroeiro, Oitaros, Cascaes, S. Juliao, Cabo Espichelle Sagres, the following signals, indicating:-

1. Signal announcing fresh wind or galc from the north (from WNW to east, passing by the north).

2
2. Signal announcing fresh wind or gale from the south (from SE to west, passing by the south).

3
3. Signal announcing storm without indicating the place in which it must discharge.
4. Signal announcing storm from the north (WNW to east, passing by the north).
5. Signal announcing storm from the south (SE to west, passing by the south).
Office of the Director. of Telegraphs and Lighthouses of the Kingdom, June 1, 1871.
J. D. M. MOUSLNHO D'ALBUQUERQUE,

Director.

## UNITED STATES COASTS AND INLAND WATERS.

By order of the Lighthouse Board, W. B. SHUBRICK, Chairman.

Treasury Department, ofice Lighthouse Board, Washington, D. C., Sept. 27, 1871.
The bell-boat recently placed on South Breaker, Penobscot Bar, has been run into and damaged so as to cause her to sink. She was raised and taken to Portland for repairs.
important to masters of american vesselsuse of ligitted torcuzs by sailing vessel.s. Treasury Dept., Washing ton, Sept. 22, 1871. To Collectons of Customs and Othens:-

It has been represented to the Depariment that the use of a lighted torch by sailing ressels on the approach of a steamer during the night time, as required by section 70 of the act of Feb. 28,1571 , endangers the safety of such ressels when laden with wond, hay, or other combustible material.
The Department is of opinion that it would not be justified upon a technical definition of the words "lighted torch," as used in said act. to expese to extraordinary and unnecessary perils one class of navigators, on the pretense of diminishing the perils of another class. It is further suggesied that when high winds are prevalent a temporary light of this character is liable to be suduenly extinguished, thus defeating the object of its use.

You are, therefore, instructed that whenerer it is apparent that the use of a torch or flaming light would cndanger the safety of the class of vessels referred to, and that a different light may substantially answer the purpose of the law, a large globo light may be used instead of a lighted torch : Provided, howeve?, that such globe light be wared or swung to and fro in such a manner as to distinguish it from a permanent light.

GEORGE S. BOUTWELL,
Secretary of the Ireasury.
sullivan's island, charleston harbor.-FEbe, 'fl.
The light on Sullivan's Island, Charleston Harbor, S. C., is shown from an enclosed firame beacon, on a two-story frame dwelling, 100 fee cast of lort Moultric, and 1,000 feet northwest of its present position. The dwelling and beacon will be painted white ; the character of the light, its height above the sea level and its compass range of visibility will not be changed.

Fort pickicring light, winter island, entrance to salem harbor.-January, 1871.
A fixed white light is exhibited at Fort Pickering. The light is located on the beach, at the line of mean tide on the SE point of Winter Island, 25 feet above high-water mark, and 30 feet abore mean tide.
The light is cxhibited from the top of a wrought iron shaft. The illuminating apparatus is of the fifth order of the system of Fresnel, and illuminates 270 deg of the horizon.

The lantern and shaft are painted red. This light must be kept on the starboard hand on cntering the harbor.

Derby wharf (Salcm) harbor light, bears SW by W $1 / 2 \mathrm{~W}$, by compass, 1 nautical mile. A fixed red light.

This light is located at the end of Derby wharf, 15 feet above the top of the wharf, and 22 fect above mean tide.

The lens is of the fifth order of the system of Fresnel, and illuminates $\equiv 70$ degrees of the horizon.
The lantern is painted red. Fort Piekering light heads $N E$ by $E 1 / 2 E$ by compass, onc nautieal mile.
soutir carolina-charleston marbor.
On and after Feb. 1, 1871, the lights exhibited from both of the Morris Islaad beacons, serving as a range for crossing the bar of the main chamnel; the light exhibited from Weehawken light-rcesel, and the light exhibited from Castie Pinckney, Charleston harbur, S C, will be white, instead of red.

GEORGETOWN, S. C., BAR.-NEW BLOY.-FEB., '71.
A first-class sea buoy has been placed on the Georgetown bar, about five miles from the lighthouse on North Island, in four fathoms of water, the lighthouse bearing NNW.

Richmond, Va., Feb. 16, 1871.
To the Editor of the Nelv York Herald:-
I beg to inform you, for the benefit of ressels trading to Richmond, Va., that the bar in Trent's Reach, James river, which was filled up by the freshet of Oct. 1. 1870, has been dredged, and a channel-way 75 fcet wide and 14 feet deep is now open, with a line of buoys in position to designate the cut across the bar.
R. D. MTNOR,

Lngineer James River Improvement.
new york-plum tsland (long island solid) FOG-BELL.-APRIL, 1871.
A fog-bell, struck by machinery at interrals of every 15 seconds, has been erected at Plum Island lighthouse, enst end of Long Island Sound, and will be rung during foggy and thick weather.
massachesetts-salem farbor.-April, 1871.
A fised white light is exhibited from a temporary Wooden tower on Hospital Point, north side of Salem Harbor; cxhibits from sunset to sunrise, erery night, until the completion of the permanent structures at that light-station.
The illnminating apparatus is a lens of the third order, smaller size, and placed at an elevation of 40 feet abore the mean lerel of the sea.
This light will be seen in range with the main (highest torer) light on Baker's Island, to the southward and westward of which range line the shoals and rocks lie. A fixed flash-panel is placed in the line of the centre of the main ship channel lring between Baker's Island light and Little Xisery Island. making a more brilliant fixed light than that on cither side of it, and serving to guide ressels clear of danger on either side of the midchannel.

The following additional distinctive marks will designate the positions of the three following named buors in the Lower Bay of New Fork:-

1. The first-class Non Bnoy, marking the "outer entrance to Gedney's (or main) Channel." will be distinguished from that of the Sonth Channel by haring a perch on top with a small hoop iron ball, painted like the buor, with white and black perpendicular stripes.
2. The Red Can Buoy, No. 6. that marks the "south end of Romer Shoal," and on the starboard side of Gedney's Channel, at the turning point for going around "Southwest Spit," will be distin, grished from No. 6 red, of the "Swash Channel," by having a perch on it with a square cagework of hoop iron painted red, like the buoy.
3. And the Red Buoy, No. 81/4, which lies off the west end of Southwest Spit. will also be distinguished from other buoys in the ricinity by a perch and ball painted red.
4. The Midchannel Spar Buoy, in the South Channel. will be replaced by an iron can bnoy, painted like the Spar, with white and black perpendicular stripes.
carter's harbor-baneg.
The following buoys hare been placed at the entrance to Carver's Harbor, Me. :-
Colt Ledge-Red spar bnoy. South BreakerBlack spar buoy. Cread's Leilge-Red spar buoy. Norton's Point Ledge-Black spar buoy.

The following buoys have becn placed in Southern Fox Island Thoroughfare:-
Laury's Ledge-Red spar buoy. Harbor Point Shoal-Red spar buoy. Avery's Ledge-Red spar bunv. Sonth Bay Ledgo-Red spar buoy.
The following buoys have been placed at Cape Porpoise Harhor:-

Goat Island Point-Red spar buoy. Gangwoy Rock-Black spar buoy.
depth of water at wilmingrox, x. c.-may, 1871.
Capt. J. B. Lawton, Harbor Master, reports the following soundings, made on the 2tth April. Western Bar, 10 feet 8 inches; on the lip 7 feet 10 inches. These soundings are taken at low tide. A rise of $42 / 2$ feet would gire 12 feet 4 inches on the Rip and 15 feet 2 inches on the Bar.
half-day rock, COAST OF MANE.-MAY, 1871.
A fixed white light, raried by red flushes once in erery minute, is exhibited from the recently erected lighthouse tower on Halfway Rock, in Casco Bay, Maine.
The color of the tower is gray, 66 feet in height abore the face of the rock.

The illominating apparatus is of the third order.
Bearings-Seguin lighthouse E 121/6 miles: Mark Island Monument NNE 3 miles; Portland Head light IV $71 / 2$ miles; Cape Elizabcth lighthouses WSW 9 miles.

MASSACHUSETTS-FOG-SIGNAL AT CAPE ANA.
The fog-trumpet at Thatcher's Island (Cape Ann light-station) has been replaced by a steam fogwhistle.

During fogs and snow-storms the whistle will be soundei, giving each minute a blast of 8 and a blast of 4 seconds. With an interral of 4 seconds between the two blasts.
steam fog-whistle at eatox's neck lighthouse, LONG ISLAND, N. Y.
A twelre-horse power steam engine, to work a syren, has been placed at Eaton's Neck lighthouse station, on Long Island. at side of the entrance to Huntington Bay. Daring thick, foggr and snowy weather this signal will be sounded, giving blasts of 9 seconds in duration, at intervals of 15 sec onds.
NEW JERSET-ABSECOM LIGTTHOUSE.-JULY, 1871.
The following change in the distinguishing char acteristics in the appearance of the tower has been made :-The color is changed from red (brick color) to three equal horizontal bands-viz., the upper (inclnding the lantern and watchroom gallery railing) to be white, the middle red and the lower white. Each band is 52 feet wide.
tucker's beach lighthouse.
Also of a change in the distinguishing character istics in the appearance of the tower and keeper's dwelling as follows:-The color is changed from a gray to a bright red.

LONG ISLAND, NEW TORK-(CORRECTED)-STEAM fog signal at eatox's neck hightholse, long ISLAND, NEW YORK.
Notice is hereby giren, that a trelre-horse power steam engine, to work a syren, has beeu placed at Eaton's Neck Lighthouse station, on Long Island, at the east side of the entrance to Huntington Bay. During thick, foggy, and snowy weather this fog signal will be sounded, giring blasts of nine seconds duration, at interrals of thirtr-five seconds. (In the notice previously given, it was erroncously stated "at interrals of fifteen secouds.")

## DUXBUEY PIER LIGHTHOUSE, PLYMOUTH ROADS-

 MAss.A fifth-order fixed white light, illuminating an are of 315 degrees, will be exhibited from the tower recently erected near Duxbury pier, in Plymouth Roads, Mass., on the erening of September 15 th next, and crery night thereafter, from snnset to sunrise.

The structure is bnilt of iron, in 7 feet water at mean tide, and is painted red.
The height of the light will be forty feet above the mean lerel of the sea, and should be seen in
clear weather, from the deck of a ressel 15 feet above water, 11 nautical miles.
dangerous sunken rock.-AUG., 1871. Say Francisco, Aug. 31.
A dangerous sunken roek, on whieh several ressels are beliered to have been wreeked, has been diseovered near the Farralones. It was sought for frequently, but never loeated definitely.
martin's industry lightship.-Sert., 1871.
The old Frying Pan lightship, which was in the harbor of Charleston for repairs, has been towed to, and is now on the anchorage of the Martin's Industry Lightship, which was swept away by the recent gale.
monhegan light-station.
A steam fog whistle has been established at Monhegan light-station, to take the plaee of the fog-trumpet heretofore sounded. It will give two blasts per minute, with an interval between each blast of cight seconds.

Long beach.
A red light is now displayed from the top of the tower of the new lighthouse on Long Beach, and will be kept there until the light is ready to be shown.

## boston lighthouse.

The Lighthouse Board have placed a powerful fog-horn at Buston lighthouse, for the guidance of ressels in the ricinity. It is blown by steam and is of great power. When used for the first time. it was heard on board tho Cuuard steamship Samaria, betweer 7 and 8 miles distant, and so distinetly that the pilot ran safely in during the dense fog and brought her to East Boston.

FOG-SIGNAL AT PIGEON PONT, CAL
Notice is given that a fog-whistle will be in operation daring foggy weather at Pigeon Point on or after September 10, 1871.
The characteristics of the signal will be two blasts of four seeonds' duration, separated by alternate interrals of seven and forty-fire seconds.
penobscot bay.
A bell-boat has been placed on South Breaker, entrance to Peuobscot Bay.

COAST OF MAINE-LITTLE RIVER LIGHT-STATION:Ост., 1871.

A for-bell (struck by machinery) has been established 200 feet distant S by E from Little Pirer lighthouse, on the coast of Maine, which will be sounded daring fogs and all thick weather. There will be two blows every minute.
The fom-bell bailding is a pyramidal structure, painted white.

## PaCLFIC COAST-SUNEEN ROCK in the harbor of san francisco.-Oct., 1871.

A danger to narigation has been discorered in Mission Bay, harbor of San Francisco, between Mission Rock and Point of Rocks, and is made known by authority of Prof. Peirce.
It is a double-headed rock of very small extent, each head not more than three feet across, and the heads abo:t ten feet apart. There is a depth of 12 ! feet upou them at mean low water, with fire fathoms of water over muddy bottom close around them. From the outer rock, the north corner of Merrimaek street wharf, off Long Bridge, bears N 80 degrees W (magnetic), distant 251 yards. The ranges for it are:-Lone Mountain open three breadths of the tall chimney of the San Francisco Assay and Refining Works (the tallest in the neighborhood) to the south, and the top of the
eastern head of Mission Rock, or with the elump of bushes on the eastern slope of Yerba Buena Island.

THE SUNKEN BRIG E. P. SWETT-NEW YORK BAYlies in seven fathoms of water, direetly in the track of all light-draught vessels bound in from the south. The mainmast is some twenty feet out of the water, with maintopmast stauding; foremast head at low water six feet out, and all the three spars attached to the wreck by their rigging. The main lighthouse on Sandy Hook bears by compass from the wreek, NW $+W$, distant $43 / 4$ miles; Highland lights, SW by W, 4 miles : Sandy Hook beaeh, 23/4 miles.
boston harbor.
Notice is hereby giren that the unn and ean buoys, in Boston Harbor, Vineyard Sound, and Buzzard's Bay will be taken up for the winter, and their places supplied with spar buoys of corresponding colors and numbers.

SALEM MARBOR.
The beacon on Bowditch Ledge, entrance to Salem Harbor, has been entirely destroyed by the late gale.

RHODE ISLAND-PUMHAM ROCK LIGHT, PROYIDENCE RIVER, R. I.

On the 1st of Deeember, 1871, a fixed white light will be exhibited at Pumbam Rock. The light is orer the keeper's dwelling, and is 69 fect abore lowwater mark.
The rpparatus is a lens of the sixth order, illuminating an are of $18 ?$ derrees.

The house is painted white and the lantern black.

## harbor of providence

The Crook Buoy, on the west side of the channel in Providence harbor, has been missing for several days, and some of the buoys in Seekonk Channel are also missing.

ENTRANCE TO BRIDGEPORT HARBOR.-NOVEMBER, 1871.

The light has been built on a sito 250 feet southmard of the old light. The structure is an iron serew pile foundation. the iron piles of which are painted red. The dwelling and the tower surmounting the piles are paiuted white, the mansard roof slate color, and the lantern black. The light is a fixed red, illuminating the entire horizon. The apparatus is a lens of the fourth order. The foeal plane is 60 feet abore mean tide, and should be scen in clear weather $131 / 2$ miles.

The fog-bell will be struek by machinery, during foggy and thick weather, at interrals of 15 seconds.

The structure is pasced to the eastrard, but should not be approaelied nearer than 200 feet.
long beach bar light-entrance to orient and green pont halbors, long island, new YORK.-NOV., 1871.
A fixed red light of the fifth order, illuminating the entire horizon, is exi ibited on the iron seretwpile lighthouse crected un Long. Beach Bar in five feet water at mean tide. The piles are painted red, the dwelling and the tower surmounting the piles white, and the lantern black. The lighthouse should be passed at a distance of not less ihan 160 feet. A spar huoy marks the extremity of the bar. The local plane is fifty-sight feet abore menn tide water, and the light should be seen in clear weather about 13 miles. A bell will be struck by machinery at intervals of 15 seconds during thiek and foggy weather.

Steamer America, at Philadelphia, reports the buoy on the Brown gone, aid the buoy at Dan Baker's Shoal, Delaware Bay, half a mile out of place.

FOG-WHISTLE AT CAFE ELIZABETH.
On and after December 31, in thick and foggy weather, the fog-whistle at Cape Elizabeth will gire two blasts per minute, the blasts to be each of 5 seconds duration and separated by an interval of 8 seconds.

MARYLAND-LIGHTHOUSE IN CHOPTANK RIVER.
A screw pile lighthouse having been erocted in Choptank Piver, State of Maryland, to take the place of the light ressel now stationed in that river, the same will be lighted for the first time on the croning of December 23, 1871, and the light vessel withdrawn.

The structure stands in 10 feet water, mean tide, off Benoni's Point, upon the outer end of the shoal making out from said point, and distant from it in a southerly direction about $11 / 8$ nautical miles. Between the lightship and Benoni's Pcint there is a slew channel with about 17 feet depth of water. The iron work of the foundation is painted red, the superstructure white.

The illuminating apparatus is of the sixth order, showing a fixed white light, and shonld be seen in clear weather 10 nautical miles; the local plane is elevated 30 fect abore mean tide.

A for-bell, rung by machincry, and striking at intervals of 10 seconds, will be in operation during fogs and thick weather. Vessels drawing less than 10 fect can approach as close to the lightship as may be desirable.

## MISSIGSIPPI - CAT ISLAND - MISSISSIPPI SOUND.Nov., 1871.

A new lishthouse has been erected on the western end of Cat Island, Mississippi Sound, thirty fcet due west from the site of the former lighthouse.

The light will be exhibited on the evening of December 15 next, and on erery succeeding night from suuset to sunrise. The foundation consists of five iron screw piles, apon which is placed a square wooden dwelling, surmounted by a lantern.

The apparatus is a fifth-order lons, fixed light, raried by flashes erery 1 minute and 30 seconds, illuminating the entire horizon.

The fueal plane is 45 feet abore the mean level of the Sound, and the light should be seen, under ordinary circnmstances of atmosplere, from the decks oi ressels 10 fcet abore the water, 11 nautical milos. The piles and lanterus are painted red and the dwelling white.

LONG BEACH BAR LIGHT-ENTRANCE TO ORIENT AND GREEN POINT ILARBORS, LONG ISLAND, NEW YORK. -NOV., 1871.
Notice is hercby giren that on the erening of Decomber 1, 1871, a fixed red light of the fifth order, illnminating the entire horizon, will be exhibited on the iron screwpile lighthouse erected on Long Beach Bar in five feet water at mean tide. The piles are painted red, the dwelling and the tower surmonnting the pilos white, and the lantern black. The lighthouse should be passed at a distance of not less than 160 feet. A spar buoy marks the extremity of the bar. The local plane is fifty-cight feet above mean tide water, and the light should be sson in clear weather about thirtcen miles. A. bell will be struek by machinery at intervals of fifteen seconds during thick and foggy weather.

> BEMLII ISLANDS-MLORIDA STRAIT-THE HENRY BANK SHOAL.-DEC., 1871.

The following information with reference to a shoal affecting the narigation on the bank of soundings near Bemini Islands, in Florida Strait, has been lately received:-
(All bearings are magnetic. Variation 320 deg easterly in 1871.)

A shoul, locally known as the Henry Bank, is
stated to lie about NNW half a mile from the south point of South Bemini Island and at a distance of one-fourth of a mile from the shore; this slioal is considered to have a depth of about 3 feet on it, with 3 fathoms on its in-shore side.

A s two small vessels, when passing South Bemini Island and elosing the shore for the purpose of aroiding the Florida stream, are reported to hare struck on this bank, it is recommended, from the bottom being coral and the depths irrcgular, that vessels should, when on the bank of soundings, not approate this part of South Bemini Island without due cantion.

WEST ISLAND LODGE, NEW BEDFORD.-LUC. 1871.
The can buoy, with a bush on it, on West Island Ledge, has been swept by the ice to Mosher's Ledge, and lies three-quarters of a mile about WSW from where it belongs.

## PORT ALDERTON BUOY.-DEC., 1871.

The Boston pilots report that the buoy at Point Alderton has drifted one mile ESE from its proper stistion.

## NEW YORK BAY-OBSTRUCTION IN OUTER MIDDLE GROUND.-DEC., 1871.

The obstruction cansed by the sinking of a brigantine near the Outer Middie Gronnd, in tho track of vessels bonnd to New York from Southern ports, is marked by two red and white horizontalstriped spar buoys, placed one on each side of the sunken ressel, which lies head to the north, in $71 / 2$ fathoms of water. The bearings from the buoys are:-Highland Lights, WSW; Sandy Hook main lighthouse, NW $1 / 2 N$; outer buoy of the Sonth Channel, N by E $1 / 2$ E.

## BANTAM LEDGE BUOY.

A note from Capt. Henriques, of U. S. steamer McCulloch, says the buoy on Dantam Ledge is gone. This is a dangerous lodge, and shou!d hare some mark on it immediately.

OBSTRUCTION IN GEDNEY'S CHANNEL.
The obstruction caused by the sinkirg of a steamtug in Gedney's Channel is marked by a red and black horizontal spar buoy. The benrings from the buoy are: Highland Liglits, SW by $\mathrm{S} 1 / 2 \mathrm{~S}$; Sandy Hook Lighthonse, WSW; Black Buoy, No. 1, Gedney's Channel, SSE; Red Buoy, No. 2, Ged. ney's Channel, NE.

By order of the Lighthouse Board,
JOSEPH HENRY, Chairman.
Wasmington, D C, Dec. 11, 1871.

## WEST LNDIES.

WEST INDIED-JAMAICA-BUOIS IN FORT MORANT.
The following buoss havo been moored in Port Morant, Jamaica, viz.:-

Two buoys at the entrance-
East buoy, red, with staff and cross rane, in $41 / 2$ fathoms, with the following bearings:-Pero Point, N1/2 (easterly), 7 cables; Leith Hall Pier, NNW 1/2 W.

West Bnoy, red and white stripes, rith staff and cross picces, in $43 / 4$ fathoms, with the following marks and beacings :-Middle of Red Cliff on with the centre house on the hill $N 1 / 4 \mathrm{E}$; Battery NW by W $1 / 2 \mathrm{~W}$, nearly half a inile.

Three buoys in the harbor-
Harbor shoal buoy, lead color, on the NE edge of the harbor shoal in $23 / 2$ fathoms, Leith Hill Pier bearing NW, nearly 7 cablen.

Cotton Treo Spit buoy, white, on the western edge of the Cotton Trec Bank, in 3 fathoms; from it Pero Point bears S by $\mathrm{E} 3 / 2 \mathrm{E}, 3, / 2$ cables.

CFFICIAI CERTIFICAME of tho Prosichen aud Mombers of tho International Jury on Mrusical Instruments, (Class X.)

FEIIS, OEscial IUeportcr,

Giongr EASTNER,

1. A. GEVAENT, AMBROISF THOMAS, 1.1). HANSLICK. J. SCHIEDMAYER,

Vicmbers Internatio:ial Jury.

This qinanimous decicion of the Internetiornl JLry, afirmed by the Imperial Commission. In e'assifying this Ifcdal First in order of Merit over all ctler American Exhibitore, and over more inan slo Pianos entercd by nearly all tie celebrated manufacturers of Eurore, being tie final Verdict of the oniy 'Tribunal determining the runk of the AFinrus at the Fuposition, place

THE STEINWAY PIANOS AT THE HEAD OF ALL OTHERS.
Ertract from the Official Forort of 17 e Irterretioral Jury on Nusical Instruments, published by the Imperial Commission in August, 18ts, ccmlaling the relativemerits of the pianos exhibited:
"the Pianos of Messrs. Stpinney \& Ecrs ale endowed with the splendid conority, and that seizing largeness and volvme of tone hithelio h.rhnown. nhich fils the greatest epace. Briliant in the treble, singing in the middle, and formiciable in tLe tass; this sonority acis with irresisible power on the organs of hearing. In regard 10 exprcseion, citlicte: Ledirg. Jeritiy of eccentuation, the instruments of Messrs. steinway have ovcr thnse of their crmpetitcis in idvantefe which cannot be contested. The planist feele under hishandsan acticn pliant and easy, which permits him at will to be powerful or light, vehement and graceful. These pianos are at ire camelire the instrument of the virtuoso, who wishes to ustonish by the eclat of his execution, and cf ihe ertist w. ho arplies his talent to the music of thought and sentiment bequeathed to 1 s by the illustricus masters: in, crie ucrd, thicy are at the same time the piancs forathe Concent Room and the Farior, Fossessing an cxccptionable soncrity."

朋ESSRS, STEINYAY \& ECFE' M M FNOTH RANUFACTORY is now conceded to be not only the most rerfectly arranfecl, Let atlle famotime the most extensive establishment of its kind in the world, the oflicial Revenve I eturns as published for the years $1866-63$ having revealed the gtarting fact that the number of pianos menusactrred by Dcerrs. Steinwey (sixty instruments per week, and the amount of their sales are more 17 ancicnife troce cf ile rrat larscet n:anufacturcr in America, and exsced those of tite twelve largest fiaro mai.crs of N゙ew Fork ccn. Vincd.

TIF ETEINTV $Y$ PJANOS are preferred to s? cthcTs by the most celebrated pianists of the world. and uzed by all the princigal Concert irouges wtcrcrer attainable.

STEINW AT \& SONS are the only Amer'can frm whose Pianos have a "world wicie" reputation, being exported in lurge and constontly frcreasing numbers to luropeand all parts of the civilized world. Steinway's Pianos are snught to be copied by nearly all American and European piano nakers, many of the latter announcing through the public papers that their yianos are constructed on the "Steinway" Eystem.

## DR. RADWAY'S SARSAPARILLIAN RESOLVENT.

Every drop of the Sarsaparillian Resolvent communieates through the Blood, Sreat, Trine, and other fluids and juices of thesystem, the Vigor of Life, for it repairs the wastes of the body with i.ew and sound material. Scrofula, Syphylis, Consumption, Glandular Diseases, Ulcers in tho Thrcat, Mcuth, Tumors, Nodes in the Glands and other parts of the system, Sore iyyes, Strumorous Discharges frum the Ears, and the worst forms of Skin Diseases, Fruptions, Fever Sores, Scald Head, Ring Worm, Salt Rheum, Lrysipelas, Acne, Black Spots, W orms in the Ilesh, Tumors, Cancers in the Womb. and all weakening and painful discharges, Night Siveats. Loss of Sperm, and all wastes of the Life Princip.e, are within the curative rango of this $W$ onder of Modern Chemistry, and a few days' uso will provo to any person using it for either of these form: of discase, its potent power to caro them.

If the patient, daily becoming reduced by tho wastes and decomposition that is continually progressing, succeedsin arresting theso wastes, and repairs the same with ncw matcrial, mado from healthy blood (and this the SARSA PARILLIAN will and does securc) a cure is certain ; for when once this remody comnences its work of purification, and sueceeds in dinninishing the loss of wastes, its 1 cpairs will bo rapid, and every day the patient will feel himself growing better and stronger, the food digesting better, apptito improving, und fesh and weight incleasing.

Not only does the sinsapabilidan Resolvent cecel ail known remedial agents in the curc of Chronic, Scrofulous, Constitututional, and Skin Diseases; but it is the only positive curo for Kidney and Estadder Complaints, Urinary and V omb Discases, Gravel, Diabetes, Dropsy, Stoppage of Water, Ineontinence of Urinc. Bright's Disease, Albuminuria, and in all cases where there aro brickdust deposits. or the water is thick, cloudy, mixed with sulstances like the whito of an egg, or threads like white silk, or there is a morbid, dark, bilious appeararce, and white bonc dust deposits, and when there is a pricking, burning sensation when passing water, and rain in the emall of the beck and along the loins.

## Tumor of 12 yoars' growth cured by Radway's Resolvent.

Beverif, Mas:s., July 18, 1869.
Dr. Radway-I have had Ovarian Tumor in tho oraries and bowels. All the doctors said "thero Tras no help for it." I tried every thing that was recommended, but nothing helped inc. I saw your Resolveat and thought I would try it, buthad no faith in it beeause I had suffered for twelvo jears. I took six bottles of the Resolvent, and one box of Kadway's Pills, and two bottles of your Ready Relief, and there is not a sign of tumor to be seell or felt, aud I feel better, smarter, and happier than I have for twelve years. The worst tumor was in tho left eido of the bowels, over the groin. I write this to you for the benest of cthers. You can publisi it if you choose.

HANNAH P. KNAPP.

## Circular Saws wilh Movable or Inserted Teeth.

The accompanying engraving represents a new and improved Circular Saw with inserted teeth, manufactured by vs, and constructed on a plan in which is combined a mechanical arrangement embracing all the requirements of inserted teeth without an objectionable feature.

The teeth ers grooved all around and comprise considerably more than half a circle; consequently, Fben they are turued into the sockets they become as firmly fixed as if they were a part of the plate itself. Theso saws can ho run at any speed desired, and there is no possibility of the teeth boing thrown out of their sockets from any cause. There are no rivets requircd. In these and othor respects they have an advantage over all other inserted-tooth saws manufaciecred.
